**Losing Touch with Nature** Mary Thomas Crane, 2014-11-24 The rise of modern science stirred up a mix of unease and exhilaration that profoundly influenced early modern English literature During the scientific revolution the dominant Aristotelian picture of nature which cohered closely with common sense and ordinary perceptual experience was completely overthrown Although we now take for granted the ideas that the earth revolves around the sun and that seemingly solid matter is composed of tiny particles these concepts seemed equally counterintuitive anxiety provoking and at odds with our ancestors embodied experience of the world In *Losing Touch with Nature* Mary Thomas Crane examines the complex way that the new science's threat to intuitive Aristotelian notions of the natural world was treated and reflected in the work of Edmund Spenser Christopher Marlowe William Shakespeare and other early modern writers Crane breaks new ground by arguing that sixteenth century ideas about the universe were actually much more sophisticated rational and observation based than many literary critics have assumed The earliest stages of the scientific revolution in England were most powerfully experienced as a divergence of intuitive science from official science causing a schism between embodied human experience of the world and learned explanations of how the world works This fascinating book traces the growing awareness of that epistemological gap through textbooks and natural philosophy treatises to canonical poetry and plays presciently registering and exploring the magnitude of the human loss that accompanied the beginnings of modern science

**Lost from View** Nina Biehal, Fiona Mitchell, Jim Wade, 2003 Thousands of people are reported missing each year yet very little is known about who they are why they disappear and what happens to them Although the predicament of runaways and other missing children has a higher profile the issue of missing adults has been neglected in research and policy Drawing on almost 2000 missing persons cases the report explores vbTab who goes missing vbTab why people choose to go missing and how people can become missing in other circumstances vbTab the experiences of missing people while they are away and the risks that they may encounter vbTab how missing episodes are resolved vbTab how further developments in policy and practice may assist missing people and their families This highly topical report demonstrates that the social problems underpinning the missing issue cut across many areas of social policy This book will therefore be essential reading for policy makers practitioners and academics in the fields of criminal justice child and family welfare health and social work
