Einstein vs. Bergson Alessandra Campo,Simone Gozzano,2021-11-08 This book brings together papers from a conference that took place in the city of L Aquila 4 6 April 2019 to commemorate the 10th anniversary of the earthquake that struck on 6 April 2009 Philosophers and scientists from diverse fields of research debated the problem that on 6 April 1922 divided Einstein and Bergson the nature of time For Einstein scientific time is the only time that matters and the only time we can rely on Bergson however believes that scientific time is derived by abstraction even in the sense of extraction from a more fundamental time The plurality of times envisaged by the theory of Relativity does not for him contradict the philosophical intuition of the existence of a single time But how do things stand today What can we say about the relationship between the quantitative and qualitative dimensions of time in the light of contemporary science What do quantum mechanics biology and neuroscience teach us about the nature of time The essays collected here take up the question that pitted Einstein against Bergson science against philosophy in an attempt to reverse the outcome of their monologue in two voices with a multilogue in several voices

The Gospel of Mary Magdalena And Me Rethy Devi,2021-08-31 I m pleased to introduce my novel I have invested last 10 years of my life researching writing and rewriting

this book More than 500 books I have read before I wrote this novel Born out of diversity each of these women lived apart for centuries without any meeting finally provides a context and a narrative style unique to this novel And it unravels a freshness of spirit The tug of war between the ideologies of the east and west the interplay of similarities in human nature spread over a vast expanse of time help interpret and understand herself The story draws its inspiration from my interest in the intriguing nature of feminist ideas alongside spirituality and sexuality It was a sincere effort to highlight my passion for feminist philosophies psychology and politics I chose to write a fiction as I enjoy telling stories and found it a good medium to weave in my other interests in sociology history metaphysics and quantum physics The first part of the novel deals with the recital of life experiences of Mary Magdalene who lived nearly two thousand years ago there was a noble woman called Lexmi who lived in modern era In the second part Lexmi relates to Mary Magdalene her woes as a philosopher and her frustrations reflective of life in today s world War is just like terrorism 20 million people died in the two world Wars and 10 million people vanished at the time of partition of India My novel is seriously discussing these issues

Poiesis Peter Acton, 2014-10-15 Poiesis brings together archaeological finds ancient texts and inscriptions recent scholarly analysis and the expertise of modern craftsmen to investigate every known facet of Athens manufacturing activities Despite the fact that Athenians consumed great quantities of manufactured goods and around half of the residents of classical Athens can be shown to have been dependent for survival on manufacturing in some form the subject has been almost completely neglected by historians The book draws on the analytical techniques of contemporary business economics supply and demand competition theory and risk return analysis to explain events and choices Manufacturing operations are classified in an original framework that explains why certain segments were suited to the sole craftsman and others to teams of slaves and deduces earnings potential based upon barriers to entry and competitive differentiation The result is a new and refreshing angle on how Athenian society operated that complements political military and literary perspectives with important and often surprising implications Among other insights the analysis shows how fragmented industry structures were fundamental to the workings of Athenian democracy by enabling citizens to supplement their income through casual manufacturing activity

From Bharata to India M. K. Agarwal, 2012-05 The origin of world civilization can be traced to the Sindhu and Sarasvati river valleys located in present day Pakistan as early as 8 000 BC Here innovation and originality in every aspect of human endeavor from mathematics and science to art and sports flourished Yet the importance of this civilization known as the Vedic period has been deliberately downplayed Thoroughly researched and including an extensive bibliography From Bharata to India rectifies this mistake in the

perspective of world history and seeks to offer a comprehensive reference source Author M K Agarwal shows how this early culture where ideation by enlightened philosopher Brahmin kings brought material and spiritual wealth that was to remain unchallenged until the colonial era This Vedic Hindu Buddhist legacy subsequently influenced peoples and paradigms around the globe ushering in an era of peace and plenty thousands of years before the Europeans By using original sources in Sanskrit as well as regional literature Agarwal compares corresponding situations in other civilizations within the context of their own literary traditions and records to prove that Bharata forms the basis of world civilization This is in direct contrast to the Greek or Arab miracle hypothesis put forth by numerous scholars The first of two volumes in this series From Bharata to India offers a fascinating in depth glimpse into ancient India's contribution to the modern world **The Myths of Innovation** Scott Berkun, 2010-08-20 Berkun takes a careful look at innovation history including the software and Internet Age to reveal how ideas truly become successful innovations truths that people can apply to today's challenges
