Clinical Evolutions on the Superego, Body, and Gender in Psychoanalysis Janice S. Lieberman,2018-09-03

Patients in psychoanalytic treatment present with a variety of problems that reflect contemporary cultural issues and values

Clinical Evolutions on the Superego Body and Gender in Psychoanalysis explores the effects of such societal changes on psychoanalytic theory and clinical practice covering topics such as greed envy and deception body narcissism gender roles and relationships

Janice S Lieberman includes numerous clinical vignettes and insights into working clinically with changing norms

Lieberman explores how changes in values and norms of behavior in the world beyond the consulting room have influenced what is now heard by analysts within it using clinical data to demonstrate the psychological underpinnings of the values promulgated by current trends in politics and in society more widely

She explores what she observes to be a new superego where deception abounds and often goes unpunished where greed and envy have arguably increased and there is an enhanced emphasis on the body and its appearance

Traditional gender roles have been challenged in fortuitous ways but a certain amount of chaos and confusion has ensued

Relationships are found and maintained using technology yet many feel lonely and empty

She writes about the clinical dilemmas she has faced and offers suggestions for resolving them in working with today s patients

Lieberman also sees parallels for these developments in several artists lives and in their work

Clinical Evolutions on the Superego Body and Gender in Psychoanalysis will be of great interest to psychoanalysts and psychoanalytic psychotherapists

The Psychopolitics of Food

Mihalis Mentinis, 2016-06-10 The Psychopolitics of Food probes into the contemporary foodscape examining culinary practices and food habits and in particular the ways in which they conflate with neoliberal political economy It suggests that generic alimentary and culinary practices constitute technologies of the self and the body and argues that the contemporary preoccupation with food takes the form of rites of passage that express and mark the transition from a specific stage of neoliberal development to another vis vis a re configuration of the alimentary and sexual regimes Even though these rites of passage are taking place on the borders of cultural bi polarities their function nevertheless is precisely to define these borders as sites of a neoliberal transitional demand that is to produce a cultural bifurcation between eating orders and eating dis orders by promoting and naturalising certain social logics while simultaneously rendering others as abject and anachronistic The book is a worthwhile read for researchers and advanced scholars in the areas of food studies critical psychology anthropology and sociology
