Lost Parrots Of America:

The Lost Parrots of America Terry Dunnahoo, 1989 Discusses the extinction of several species of parrots including the Carolina parakeet and the Cuban red macaw **The Carolina Parakeet** Carole Boston Weatherford, 2005 **Restoring North America's Birds** Robert A. Askins, 2008-10-01 DIVThe decline of bird species in a wide range of North American habitats forests prairies shrublands mountain regions marshes and deserts has inspired two decades of intense scientific study of bird ecology and conservation But for professional scientists and amateur birders alike interpreting the results of these diverse studies is often complex and bewildering This accessible book pulls together recent research on bird species and habitats to show how basic ecological principles apply in seemingly different situations Robert A Askins provides an engaging introduction to bird ecology and concepts of landscape ecology focusing on such intriguing species as Bachman s Warbler Red Crossbill Mountain Plover and Marbled Murrelet Understanding the ancient landscapes of North America and how humans have changed them Askins says is essential for devising plans to protect and restore bird populations In addition to such obvious changes to the landscape as the clearing of forests and plowing of prairies more subtle changes also dramatically affect birds Species may disappear when we interrupt natural disturbances by suppressing wildfires or trapping out beaver or when we disrupt habitat with roads and housing developments Askins challenges some of the assumptions that underlie current conservation efforts and offers concrete recommendations based on sound ecological principles for protecting the rich natural diversity of North America s birds div **Gone Forever: The lost parrots of America** , Each book describes the history life cycle and characteristics of an extinct species Wild New World Dan Flores, 2022-10-25 Winner of the 2023 Rachel Carson Environment Book Award Winner of the 2023 National Outdoor Book Award for Natural History Literature Shortlisted for the 2023 Phi Beta Kappa Society Ralph Waldo Emerson Award A Kirkus Reviews Best Nonfiction Book of 2022 A deep time history of animals and humans in North America by the best selling and award winning author of *Coyote America* In 1908 near Folsom New Mexico a cowboy discovered the remains of a herd of extinct giant bison By examining flint points embedded in the bones archeologists later determined that a band of humans had killed and butchered the animals 12 450 years ago This discovery vastly expanded America s known human history but also revealed the long standing danger Homo sapiens presented to the continent s evolutionary richness Distinguished author Dan Flores s ambitious history chronicles the epoch in which humans and animals have coexisted in the wild new world of North America a place shaped both by its own grand evolutionary forces and by momentous arrivals from Asia Africa and Europe With portraits of iconic creatures such as mammoths horses wolves and bison Flores describes the evolution and historical ecology of North America like never before The arrival of humans precipitated an extraordinary disruption of this teeming environment Flores treats humans not as a species apart but as a new animal entering two continents that had never seen our likes before He shows how our long past as carnivorous hunters helped us settle America initially establishing a coast to

coast culture that lasted longer than the present United States But humanity's success had devastating consequences for other creatures In telling this epic story Flores traces the origins of today's Sixth Extinction to the spread of humans around the world tracks the story of a hundred centuries of Native America explains how Old World ideologies precipitated 400 years of market driven slaughter that devastated so many ancient American species and explores the decline and miraculous recovery of species in recent decades In thrilling narrative style informed by genomic science evolutionary biology and environmental history Flores celebrates the astonishing bestiary that arose on our continent and introduces the complex human cultures and individuals who hastened its eradication studied America's animals and moved heaven and earth to rescue them Eons in scope and continental in scale Wild New World is a sweeping yet intimate Big History of the animal human story in America Bulletin of the Cooper Ornithological Club of California, 1918 **The Condor**, 1918 **Gulls**
