Origins of the American Indians Lee Eldridge Huddleston, 2014-12-15 An examination of early European theories about the origin of American indigenous peoples The American Indian origin culture and language engaged the best minds of Europe from 1492 to 1729 Were the Indians the result of a co creation Were they descended from the Ten Lost Tribes of Israel Could they have emigrated from Carthage Phoenicia or Troy All these and many other theories were proposed How could scholars account for the multiplicity of languages among the Indians the differences in levels of culture And how did the Indian arrive in America by using as a bridge a now lost continent or as was later suggested by some

persons in the light of an expanding knowledge of geography by using the Bering Strait as a migratory route. Most of the theories regarding the American Indian were first advanced in the sixteenth century. The two most influential men in an early developing controversy over Indian origins were Joseph de Acosta and Gregorio Garc a. Approaching the subject with restraint and with a critical eye, Acosta in 1590 suggested that the presence of diverse animals in America indicated a land connection with the Old World. On the other hand, Garc a accepted several theories as equally possible and presented each in the strongest possible light in his *Origen de los indios* of 1607. In this distinctive book, Lee E. Huddleston looks carefully into those theories and proposals. From many research sources, he weaves an historical account that engages the reader from the very first.

The Chinook Indians Robert H. Ruby, John A. Brown, 1976. The Chinook Indians who originally lived at the mouth of the Columbia River in present day Oregon and Washington were experienced traders long before the arrival of white men to that area. When Captain Robert Gray in the ship *Columbia Rediviva* for which the river was named entered the Columbia in 1792, he found the Chinooks in an important position in the trade system between inland Indians and those of the Northwest Coast. The system was based on a small seashell, the dentalium, as the principal medium of exchange. The Chinooks traded in such items as sea otter furs, elk skin armor which could withstand arrows, seagoing canoes hollowed from the trunks of giant trees, and slaves captured from other tribes. Chinook women held equal status with the men in the trade and in fact the women were preferred as traders by many later ships' captains who often feared and distrusted the Indian men. The Chinooks welcomed white men not only for the new trade goods they brought but also for the new outlets they provided. Chinook goods which reached Vancouver Island and as far north as Alaska. The trade was advantageous for the white men too for British and American ships that carried sea otter furs from the Northwest Coast to China often realized enormous profits. Although the first white men in the trade were seamen, land based traders set up posts on the Columbia not long after American explorers Lewis and Clark blazed the trail from the United States to the Pacific Northwest in 1805. John Jacob Astor's men founded the first successful white trading post at Fort Astoria, the site of today's Astoria, Oregon, and the North West Company and the Hudson's Bay Company soon followed into the territory. As more white men moved into the area, the Chinooks began to lose their favored position as middlemen in the trade. Alcohol, new diseases such as smallpox, influenza, and venereal disease, intertribal warfare, and the growing number of white settlers soon led to the near extinction of the Chinooks. By 1851, when the first treaty was made between them and the United States government, they were living in small, fragmented bands scattered throughout the territory. Today the Chinook Indians are working to revive their tribal traditions and history and to establish a new tribal economy within the white man's system.
