Paradigmatic Shifts in Geographical Thought Lalita Rana, 2020-01-01 In advancing disciplines like Geography the methodological debate is a sign of health In Geography there has been extreme diversity of viewpoints on both philosophy and methodology with constant extension and also a shift in focus The methodology of geography came under debate for the first time during the middle of twentieth century when the paper published by F K Schaefer an American scholar brought both the qualitative and quantitative revolution in geographic development Shortly after this publication were discussed the paradigmatic shifts in a discipline by Thomas S Kuhn another American scholar through his seminal work in which he painted a picture of the development of science quite unlike that had gone before In order to elucidate this process of development of science Kuhn prepared a model termed as the Paradigm of Science Distinct parallels may be sought between the historical evolution of scientific discipline as explained by Thomas Kuhn and the historical evolution of the discipline of geography Seeking inspiration from the works of both of the great scholars mentioned above the present book examines the evolution of geographical thought from the perspective of Thomas Kuhn Two publications of mine 2008 2014 are on this line only However the methodological literature to understand the philosophical background making possible this disciplinary growth is too small The purpose here is to explore and screen the growth and development of Geography under sequential methodological changes over time in the light of various paradigmatic shifts with the acknowledgement of crises and revolutionary phases of development in the discipline Accordingly the work identifies eight paradigmatic shifts intercepted by eight phases of crises in the discipline
