Moral Competence An Integrated Approach To The Study Of Ethics

American Philosophical Association

Moral Competence An Integrated Approach To The Study Of Ethics:

Moral Competence James Jakób Liszka,1999 Moral Competence integrates the most important aspects of ethical life into a readable relevant and comprehensive book All of the material is contextualized in a coherent account of moral life that includes many case studies queries and illustrations drawn from contemporary events **Pragmatist Ethics** James Jakób Liszka,2021-11-01 Grounded in American pragmatism Pragmatist Ethics proposes a rethinking of ethics Rather than looking to the good a concept for which consensus is difficult to achieve pragmatists instead advocate for tending to the problems of the day James Jak b Liszka examines how daily practices and institutions are originally conceived and then evolve to solve certain problems and that their failure to do so is the source of most problems Liszka argues that the ethical goal therefore is to improve upon these practices and that the sort of practical reasoning that characterizes practices can be enhanced by a more scientific empirical approach But how do we know when changes to practices and institutions are progressive Problems will plague the best of communities the better community is the one that succeeds best at solving its problems Pragmatist Ethics examines various accounts of improvement and progress concluding that the problem solving effectiveness of communities is the key to progressive changes **Ethics in Human Communication** Richard L. Johannesen,Kathleen S. Valde,Karen E. Whedbee,2008-01-09 Broad in scope yet precise in exposition the Sixth Edition of this highly acclaimed ethics text has been infused with new insights and updated material Richard Johannesen and new coauthors Kathleen Valde and Karen Whedbee provide a thorough comprehensive overview of philosophical perspectives and communication contexts pinpointing and explicating ethical issues unique to human communication Chief among the authors objectives are to provide classic and contemporary perspectives for making ethical judgments about human communication sensitize communication participants to essential ethical issues in the human communication process illuminate complexities and challenges involved in making evaluations of communication ethics and offer ideas for becoming more discerning evaluators of others communication Provocative questions and illustrative case studies stimulate reflexive thinking and aid readers in developing their own approach to communication ethics A comprehensive list of resources spotlights books scholarly articles videos and Web sites useful for further research or personal exploration *The ethics of consumption* Helena Röcklinsberg,Per Sandin,2013-11-05 We are all consumers What we consume how and how much has consequences of great moral importance for humans animals and the environment Great challenges lie ahead as we are facing population growth and climate change and reduced availability of fossil fuels It is often argued that key to meeting those challenges is changing consumption patterns among individual as well as institutions for instance through reducing meat consumption switching to organic or fair trade products boycotting or buycotting certain products or consuming less overall There is considerable disagreement regarding how to bring this about whose responsibility it is and even whether it is desirable Is it a question of political initiatives producer responsibility the virtues and vices of individual consumers in the developed world or something else

Many of these issues pose profound intellectual challenges at the intersection of ethics political philosophy economics and several other fields This publication brings together contributions from scholars in numerous disciplines including philosophy law economics sociology and animal welfare who explore the theme of the ethics of consumption from different angles **An Ethic of Mutual Respect** Bruce Morito,2012-08-30 Over the course of a century until the late 1700s the British Crown the Iroquois and other Aboriginal groups of eastern North America developed an alliance and treaty system known as the Covenant Chain Bruce Morito offers a philosophical re reading of the historical record of negotiations showing that the parties developed an ethic of mutually recognized respect This ethic Morito argues remains relevant to current debates over Aboriginal and treaty rights because it is neither culturally nor historically bound Real change is possible if efforts can be shifted from piecemeal legal and political disputes to the development of an intercultural ethic based on trust respect and solidarity **Ethical Intuitionism** M. Huemer,2007-12-14 A defence of ethical intuitionism where i there are objective moral truths ii we know these through an immediate intellectual awareness or intuition and iii knowing them gives us reasons to act independent of our desires The author rebuts the major objections to this theory and shows the difficulties in alternative theories of ethics Toward Assessing Business Ethics Education Diane L. Swanson,Dann G. Fisher,2010-11-01 Toward Assessing Business Ethics Education edited by Diane L Swanson and Dann G Fisher of Kansas State University is a sequel to their book Advancing Business Ethics Education in the Ethics in Practice IAP book series The focus on assessment in this second book is a timely response to the urgent search among business schools for ways to teach and assess ethics at a time when the public s faith in corporations and business schools has been undermined greatly by the failure of both to respond to widespread corruption and scandals in the business sector Although no one expects business education alone to resolve these problems the distinguished scholars represented in this book advocate that business schools should at least do their part by exposing their students to decision models that incorporate ethical dimensions on behalf of corporate stakeholders and society at large As the book s title conveys it is then important to assess key learning objectives to insure that business students graduate knowing ethics fundamentals and armed with the ability to recognize ethical dilemmas and possible solutions during the course of their careers This book will speak to all who are interested in accountability for business ethics education especially business school deans university administrators faculty members students and prospective employers This audience will find that the enterprise of assessing business ethics education is advanced in three ways First the book functions as a venue for distinguished scholars to share the innovative ways that they are assessing ethics coverage in courses and degree programs Second these authors identify what needs to be assessed and the means for doing so Third the book serves not only as a guide to assessment but also as a platform for expanding and improving ethics coverage in business schools Moreover an important take away for readers is the provision of a simple formula first advocated by Diane L Swanson and William C Frederick University of Pittsburgh in 2005 for delivering ethics education that

minimizes assessment errors By following this formula business schools can provide assurances that ethics will not be assessed as being sufficient when it is woefully inadequate or even missing in the curriculum and that it cannot be distorted diluted or trivialized by uninformed coverage and still pass inspection Avoiding these assessment errors is critical in an educational environment in which weak accrediting standards for ethics go hand in hand with spotty uniformed coverage that would not be tolerated for other business disciplines Ethics and Professionalism Barry Cassidy,J. Dennis Blessing,2007-08-23 The first of its kind a case based ethics text designed specifically for PAs Communication Yearbook 25 William B. Gudykunst,2001-05 This volume offers state of the art communication research representing media interpersonal intercultural and other areas of communication It is an important reference on current research for scholars and students in the social sciences *Advancing Business Ethics Education* Diane L. Swanson,Dann G. Fisher,2008-04-01 This book features sixteen chapters written by distinguished scholars who collectively point to a roadmap for advancing business ethics education at a critical juncture in the history of corporate America The editors frame the book with an introductory chapter that details a gold standard for delivering ethics in the business school curriculum that signals to students that ethics matters provides an adequate counterbalance to the amoral subtext that dominates much of business education remedies assessment problems associated with current accrediting standards and prepares students for newly minted and fast growing careers in ethics compliance risk management and corporate social responsibility The chapters that follow lay out some challenges and opportunities that administrators and educators need to address in order to improve business ethics education and business school reputations in a post Enron climate Both traditional and experimental perspectives on delivering ethics in the curriculum are covered in conjunction with research that substantiates the potential for improving student ethics competencies after exposure to ethics coursework Methods for incorporating ethics in various subjects including accounting corporate governance environmentalism global business managerial decision making and human resource management are also given as part of the roadmap for advancing business ethics education **Handbook of Workplace Spirituality and Organizational Performance** Robert A. Giacalone,Carole L. Jurkiewicz,2003 A comprehensive research based interdisciplinary and action oriented approach to spirituality in organizational life It defines workplace spirituality as all aspects of the workplace that promote individual feelings of satisfaction through a sense of connection to a larger force Environmental Philosophy Hugh P. McDonald,2014-05-10 *Environmental Philosophy* A Revaluation of Cosmopolitan Ethics from an Ecocentric Standpoint calls for a new approach to ethics Starting from the necessity for all life of air water and food the book revalues the relation of ethics and environmentalism Using insights of the environmental ethicists environmental ethics becomes the model for ethics as a whole Humans are part of a larger environment Cosmopolitanism should be revised in accord with environmental ethics The book applies a new theory of values to the relation of value and obligation and of duty rights and virtue to accord with ecocentrism The book also critically

evaluates Utilitarianism and the self interest theory Other chapters address population species preservation and a practical program for environmental policy

Communication Yearbooks Vols 6-33 Set Various,2021-12-02 The Communication Yearbook annuals originally published between 1977 and 2009 publish diverse state of the discipline literature reviews that advance knowledge and understanding of communication systems processes and impacts across the discipline Topics dealt with include Communication as Process Research Methodology in Communication Communication Effects Taxonomy of Communication and European Communication Theory Information Systems Division Mass Communication Research Mapping the Domain of Intercultural Communication Public Relations Feminist Scholarship Communication Law and Policy Visual Communication Communication and Cross Sex Friendships Across the Life Cycle Television Programming and Sex Stereotyping InterCultural Communication Training Leadership and Relationships Media Performance Assessment Cognitive Approaches to Communication
