Patterns Of Life Human Growth And Development:

Patterns of Life Phyllis B. Dolloff, Miriam R. Resnick, 1972 **Patterns of Human Growth** Barry Bogin, 1999-05-06 A revised edition of an established text on human growth and development from an anthropological and evolutionary perspective **Patterns of Growth and Development in the Genus Homo** J. L. Thompson, G. E. Krovitz, A. J. Nelson, 2003-12-04 It is generally accepted that the earliest human ancestors grew more like apes than like humans today. If they did so and we are now different, when how and why did our modern growth patterns evolve? This book focuses on species within the genus *Homo* to investigate the evolutionary origins of characteristic human patterns and rates of craniofacial and postcranial growth and development and to explore unique ontogenetic patterns within each fossil species. Experts examine growth patterns found within available Plio-Pleistocene hominid samples and analyze variation in ontogenetic patterns and rates of development in recent modern humans in order to provide a comparative context for fossil hominid studies. Presenting studies of some of the newer juvenile fossil specimens and information on *Homo* antecessor, this book will provide a rich data source with which anthropologists and evolutionary biologists can address the questions posed above.
