Peasant Rebellion Communist Revolution:

Peasant Rebellion and Communist Revolution in Asia John Wilson Lewis, 1974 **Peasant Rebellion and Communist Revolution in Asia** John Wilson Lewis, 1976 **The Communists and Chinese peasant rebellions** James P. Harrison, 1968 *Peasant Nationalism and Communist Power* Chalmers A. Johnson, 1962 This author researches the Chinese Communists wartime expansion according to the documentation recorded by Japanese intelligence then compares that expansion with that of the Yugoslav Communists *Peasant Rebellion and Communist Revolution in Asia. Contributions* John Wilson Lewis, 1974 Vietnam: Peasant Land, Peasant Revolution Nancy Wiegersma, 1988-06-18 **Peasants and Revolution in Rural China** Chang Liu, 2007-05-14 This book explores rural political change in China from 1850 to 1949 to help us understand China's transformation from a weak decaying agrarian empire to a unified strong nation state during this period Based on local gazetteers contemporary field studies government archives personal memoirs and other primary sources it systematically compares two key macro regions of rural China the North China plain and the Yangzi delta to demonstrate the ways in which the forces of political change shaped by different local conditions operated to transform the country It shows that on the North China plain the village community composed mainly of owner cultivators was the focal point for political mobilization whilst in the Yangzi delta absentee landlordism was exploited by the state for local control and tax extraction However these both set the stage in different ways for the communist mobilization in the first half of the twentieth century *Peasants and Revolution in Rural China* is an important addition to the literature on the history of the Chinese Revolution and will be of interest to anyone seeking to understand the course of Chinese social and political development Peasant rebellion and communist revolution in Asia. Ed. by J. Wilson Lewis, 1974 *Revolution* Rosemary H. T. O'Kane, 2000 All of the major work on the subject of revolutions is collected in this useful set Including work from seminal figures such as Hatto and Gottschalk in the 1940s as well as the most important literature all the way through 1998 the articles reprinted here consider the concept theory and causes of revolution revolutionary state building and the outcomes of revolutions case studies of great revolutions and much more Revolutions as Organizational Change Baohui Zhan, 2015-09-01 By comparing peasant revolutions in Hunan and Jiangxi between 1926 and 1934 *Revolutions as Organizational Change* offers a new organizational perspective on peasant revolutions Utilizing newly available historical materials in the People's Republic of China in the reform era it challenges the established view that the great Chinese revolution of the twentieth century was a revolution made by the Chinese Communist Party the CCP The book begins with a puzzle presented by the two peasant revolutions While outside mobilization by the CCP was largely absent in Hunan peasant revolutionary behaviors were spontaneous and radical In Jiangxi however despite intense mobilization by the CCP peasants remained passive and conservative This study seeks to resolve the puzzle by examining the roles of communal cooperative institutions in the making of peasant revolutions Historically peasant communities in many parts of the world were regulated

by powerful cooperative institutions to confront environmental challenges This book argues that different communal organizational principles affect peasants perceptions of the legitimacy of their communal orders Agrarian rebellions can be caused by peasants attempts to restructure unjust and illegitimate communal organizational orders while legitimate communal organizational orders can powerfully constrain the mobilization by outside revolutionary agents such as the CCP In this thorough comparative account of the peasant risings in Hunan and Jiangxi and the role of the Communist Party Professor Zhang casts new light on both the risings themselves and what they can tell us about peasant risings in general This work is strong in both theory and detailed historical research Richard Rigby professor China Institute Australian National University Professor Zhang has beautifully crafted a comparative study of divergent peasant revolutions in two Chinese regions during Mao s long revolutionary war He brings to this task a broad and deep knowledge about revolutionary theory and also a razor like analytical sensibility which enables him to examine the pros and cons of existing perspectives Timothy P Wickham Crowley associate professor of sociology Georgetown University

Anthropocene Communism Paul Guillibert, 2025-10-21 How communism can inform the ecological revolution In Anthropocene Communism the philosopher and activist Paul Guillibert proposes a brand new communism for life biocommunism With the aid of this system he hopes to move us beyond the ecological crisis of late capitalism In a highly original reading of Karl Marx s exchanges with the populist terrorists in Russia and informed by the cultural studies of Raymond Williams the Marxism of Jos Carlos Mari tegui and Ernst Bloch s attachment to the land the author develops a philosophical naturalism that rethinks our relations with the environment Rather than a fixed state this relationship is influenced by cultural social and historical practices For Guillibert if we are to move beyond the Anthropocene we must develop new strategies Communism must become environmentalism and political ecology can only become truly revolutionary once it is communist

Microfoundations, Method, and Causation Daniel Little, In Microfoundations Method and Causation Daniel Little combines a purely philosophical perspective on social

science with the theoretical and empirical practice of working scientists Part 1 focuses on the theory of popular politics constructed within the context of analytical Marxism In part 2 Little asks if rational choice theory provides an adequate basis for explaining patterns of social political and economic behavior in traditional China The essays in part 3 reveal the philosophy of social science as understood by philosophers Here Little probes issues of objectivity empiricism and generalizations and makes the case that social generalizations are not akin to laws of nature

Sources for Forging the Modern World James Carter, Richard A. Warren, 2018-09 In *Forging the Modern World* A History authors James Carter and Richard Warren offer an accessible explanation of key transformations in global economic political and ideological relationships since the sixteenth century The book is distinct from most world history texts in three important ways First it explores the ways in which historians use and produce information Each chapter delves deeply into one or two specific issues of historical inquiry related to the chapter theme showing how new primary sources methodologies or intellectual trends have changed how we engage with the past Second it clearly explains the political economic and ideological concepts that students need to understand in order to compare events and trends across time and space Finally the chapters are organized around global historical themes which are explored through an array of conceptual and comparative lenses While the book chapters proceed chronologically each chapter is written with some chronological overlap linking it to preceding and subsequent chapters This strategy emphasizes the interconnectedness between the events and themes of one chapter and those of surrounding chapters A companion sourcebook follows the main book's organization and includes approximately 67 primary sources with two questions following each source
