Morgan,Joseph M. Palmisano,1993-08 Patching Development Rajesh Veeraraghavan,2021-12-24 Diving into an original and unusually positive case study from India Patching Development shows how development programs can be designed to work How can development programs deliver benefits to marginalized citizens in ways that expand their rights and freedoms Political will and good policy design are critical but often insufficient due to resistance from entrenched local power systems In Patching Development Rajesh Veeraraghavan presents an ethnography of one of the largest development programs in the world the Indian National Rural Employment Guarantee Act NREGA and examines NREGA s implementation in the South Indian state of Andhra Pradesh He finds that the local system of power is extremely difficult to transform not because of inertia but

because of coercive counter strategy from actors at the last mile and their ability to exploit information asymmetries Upper level NREGA bureaucrats in Andhra Pradesh do not possess the capacity to change the power axis through direct confrontation with local elites but instead have relied on a continuous series of responses that react to local implementation and information a process of patching development Patching development is a top down fine grained iterative socio technical process that makes local information about implementation visible through technology and enlists participation from marginalized citizens through social audits These processes are neither neat nor orderly and have led to a contentious sphere where the exercise of power over documents institutions and technology is intricate fluid and highly situated A highly original account with global significance this book casts new light on the challenges and benefits of using information and technology in novel ways to implement development programs Government, Industry and Rearmament in Russia, 1900-1914 Peter Gatrell, 1994-03-10 This book provides an economic historian's perspective on major questions that confront all students of Russian history how stable were the economic and administrative structures of late imperial Russia and how well prepared was Russia for war in 1914 The decade following the Russo Japanese War witnessed profound changes in the political system and in the industrial economy The regime faced challenges to its authority from industrialists caught in the throes of recession and from parliamentary critics of tsarist administration Peter Gatrell provides a comprehensive account of the attempts made by government and business to confront these challenges examining the organisation and performance of a key industry and showing how decisions were reached about the allocation of resources and the far reaching consequences these decisions entailed Michener Stephen J.
