Seeing Birmingham By Tram:

Seeing Birmingham by Tram Eric Armstrong, 2010-02-01 **Seeing Birmingham by tram Vol 2** **Under the Wires at Tally Ho** David Berguer, 2011-02-01 Today pollution free transport is high on the political agenda yet it is sometimes forgotten that electric vehicles ran on the streets of London from the early 1900s until 1962 This book tells the story of that period and describes both the vehicles themselves and the effect they had on the development of the suburbs Local historian David Berguer has endeavoured to paint a picture of what life was like in the capital during this golden age travelling and working on the trams and trolleybuses and includes material based on newspaper reports council and official minutes and oral histories from those involved With many previously unpublished photographs and detail on the vehicles and routes themselves there is even a chapter on the colourful pirate buses which competed against trams in the 1920s Full of local interest and insights into daily life on north London trams and trolleybuses this celebration of the glory days of electric street traction in the suburbs of North London is bound to capture the imagination of both transport and local historians alike

Tramway and Railway World ,1897 Suburbanizing the Masses Colin Divall, Winstan Bond, 2017-09-29 This title was first published in 2003 Suburbanizing the Masses examines how collective forms of transport have contributed to the spatial and social evolution of towns and cities in various countries since the mid nineteenth century Divided into two sections the volume develops first the classic tradition on transport and the city public transport's impact on urban development The contextualisation of transport is one important factor in the historical debates surrounding urban development As well as analysing the discourse employed by urban political and business elites in favour of public transport these contributions show the degree to which practice often fell short of ideals The second section tackles the professional paradigms of urban transport the circulation of traffic in cities and the technological modes appropriate to its realization In particular these contributions explore the paradigms held by professional planners and managers and the political classes associated with them From a variety of perspectives Suburbanizing the Masses demonstrates the continuing relevance of socio historical inquiry on the relationship between public transport and urban development By differentiating between the many roles of urban transport in the nineteenth century it confirms that public transport was not directly linked to urban growth and instead often had only a limited effect on the wider urban structure Suburbanizing the Masses forces a reassessment of the received historiography that maintains cheap public transport was essential to the spectacular growth of cities in the nineteenth century **The Modern Tramway** ,1969 **The Electrical Review** ,1919 **The justice of the peace reports** ,1917
