The Elephant Tourism Business Eric Laws, Noel Scott, Xavier Font, John Koldowski, 2020-11-23 Elephant tourism is a growing activity in many countries across Asia and Africa and is popular with tourists from all parts of the world Elephant tourism has

grown rapidly providing the only viable way for elephants and their owners to survive since the banning of logging Old logging camps have been developed into sanctuaries for some elephants but many other camps were established as entertainment centres resulting in serious welfare issues for the elephants and their mahouts The profits from elephant tourism in Asia have encouraged African operators to follow a similar business model This book draws attention to the need for a comprehensive and rigorous focus on local solutions to improve the welfare of captive elephants their mahouts and local residents and to enhance tourists experiences of elephant tourism Seeing the Animal Whole Craig Holdrege, 2021-02-16

We conceive of the individual animal as a small world existing for its own sake by its own means Every creature is its own reason to be All its parts have a direct effect on one another a relationship to one another thereby constantly renewing the circle of life Thus we are justified in considering every animal physiologically perfect Goethe Every animal on earth has its own unique character the slow sloth the burrowing mole the towering giraffe the huge but flexible elephant In vivid portrayals of nine different animals Craig Holdrege shows how all of an animal's features are interconnected and reveal the animal as a whole Moreover every animal intersects with and influences the larger environment in dynamic ways Seeing the Animal Whole provides a nuanced sense for what it means to be a living being With the open ended question Who are you and with the will to let the animals themselves be his guide Holdrege avoids the pitfalls of mechanistic and anthropomorphic perspectives that skew our concepts of animals and even lead to their mistreatment This book presents an integrative view of animals and nature that you won't find elsewhere The author presents a different way of seeing and relating to nature leading to a groundbreaking understanding of animal development and evolution as creative processes with the animals as active participants Further evolution of life on earth depends largely on human activity and this book shows a way to learn from nature's living qualities so we can further rather than disrupt the health of the planet which belongs to all of its inhabitants And that matters *Bartlett's Dictionary of Americanisms* John Russell Bartlett, 1859 This is a reproduction of the original artefact Generally these books are created from careful scans of the original This allows us to preserve the book accurately and present it in the way the author intended Since the original versions are generally quite old there may occasionally be certain imperfections within these reproductions We're happy to make these classics available again for future generations to enjoy *Seeing the Heart of Christ* Bill Crowder, 2018-03-19 Christ's heart for hurting people is a reflection of the heart of the Father The man was desperate Leprosy had ravaged his body and isolation had destroyed his self worth The one thing he had was a measure of faith that Jesus could make him clean Surrounding people gave the leper plenty of space as he inched his way to the Healer and Jesus had compassion on the man healing his body and spirit with a touch and a few words The leper was just one of society's outcasts deeply hurting people whom Jesus loved through His actions The Gospels give us story after story of Jesus's dealings with people whose needs were so great their outlook seemed hopeless But Christ offered them hope and healing and forgiveness for their wounded souls Encounter our compassionate

Lord through these twelve Gospel stories that show how He met each person's unique need. Seeing the Heart of Christ provides a rich view of our Savior's love and our great need for Him. By observing His perfect example we can be comforted by His mercy and in turn comfort others.

When thirteen-year-old Mascha is sent to her grandparents for the summer, she spends her days bored and lonely at a nearby playground. There she meets Julia and Max, two young siblings who are incredibly shy and withdrawn. Mascha soon begins to suspect that they are being physically abused by their father, a prominent member of their small community. She tells her grandparents and the authorities, but they all refuse to believe her. Mascha can't let the abuse go on, so she takes matters into her own hands. Already an international award winner, this beautifully written novel is a haunting and timely tale.

Robert Lynnford, star crime reporter for The London Herald, is alerted to the theft of an extremely valuable exhibit from the Queen's Fine Art Museum in London: the Elephant's Sapphire, a much-coveted historic heirloom from Nepal which has been held by the museum since the 1880s.

Seeing the Unseen: Physics for Gen-Z Darrell Poeppelmeyer, 2025-01-10 What is reality? It's not what you think. Reality isn't just one universe; it's two. What does modern science tell us? That it's time for a reboot. By reconstructing modern physics through the lens of information theory, we can finally make sense of human experience. Can science and religion coexist? Absolutely. Both are imaginative belief systems that seek to interpret the unseen. Is it really wrong to challenge your deepest beliefs? If your answer is no, then this book is your ticket to exploring a bold new vision of reality. By merging groundbreaking science with fresh perspectives, it reveals how humanity and AI might one day wield god-like abilities to reshape existence itself. Ready to embrace the future? It starts here by learning to see the unseen.

Diversity in African languages Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31 *Diversity in African Languages* contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon. Most chapters focus on single languages, addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse-related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daatsi in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the
