Longest Battle:

Verdun Paul Jankowski, 2014-01-06 At seven o'clock in the morning on February 21 1916 the ground in northern France began to shake For the next ten hours twelve hundred German guns showered shells on a salient in French lines The massive weight of explosives collapsed dugouts obliterated trenches severed communication wires and drove men mad As the barrage lifted German troops moved forward darting from shell crater to shell crater The battle of Verdun had begun In Verdun historian Paul Jankowski provides the definitive account of the iconic battle of World War I A leading expert on the French past Jankowski combines the best of traditional military history its emphasis on leaders plans technology and the contingency of combat with the newer social and cultural approach stressing the soldier's experience the institutional structures of the military and the impact of war on national memory Unusually this book draws on deep research in French and German archives this mastery of sources in both languages gives Verdun unprecedented authority and scope In many ways Jankowski writes the battle represents a conundrum It has an almost unique status among the battles of the Great War and yet he argues it was not decisive sparked no political changes and was not even the bloodiest episode of the conflict It is said that Verdun made France he writes but the question should be What did France make of Verdun Over time it proved to be the last great victory of French arms standing on their own And for France and Germany the battle would symbolize the terror of industrialized warfare a technocratic Moloch devouring its children where no advance or retreat was possible yet national resources poured in ceaselessly perpetuating slaughter indefinitely

The Longest Fight William Gildea, 2012-06-19 Many people came to Goldfield Nevada America's last gold rush town to seek their fortune However on a searing summer day in September 1906 they came not to strike it rich but to watch what would become the longest boxing match of the twentieth century between Joe Gans the first African American boxing champion and Battling Nelson a vicious and dirty brawler It was a match billed as the battle of the races In The Longest Fight the longtime Washington Post sports correspondent William Gildea tells the story of this epic match which would stretch to forty two rounds and last two hours and forty eight minutes A new rail line brought spectators from around the country dozens of reporters came to file blow by blow accounts and an entrepreneurial crew's film of the fight shown in theaters shortly afterward endures to this day The Longest Fight also recounts something much greater the longer battle that Gans fought against prejudice as the premier black athlete of his time It is a portrait of life in black America at the turn of the twentieth century of what it was like to be the first black athlete to successfully cross the nation's gaping racial divide Gans was smart witty trim and handsome with one punch knockout power and groundbreaking defensive skills and his courage despite discrimination prefigured the strife faced by many of America's finest athletes including Jesse Owens Jackie Robinson and Muhammad Ali Inside the ring and out Gans took the first steps for the African American athletes who would follow and yet his role in history was largely forgotten until now The Longest Fight is a reminder of the damage caused by the bigotry that long outlived Gans and the strength courage and will of

those who fought to rise above

The Longest Battle Richard Hough, 2021-10-21 This is the story of the greatest naval conflict in history The Second World War demanded more of its sailors than any other war in history in endurance and unremitting need to face danger danger from increasingly lethal weapons and an ever increasing need for vigilance by day and night The war at sea the longest battle of the Second World War never ceased From the Arctic Circle to the Pacific the enemy threat was ever present on the surface in the skies and lurking beneath the waves In this comprehensive and compelling history Richard Hough brings the titanic struggle to life Using personal accounts from veterans of all sides his book tells the story of the Second World War at sea including the Battle of the Atlantic and the U boat menace the infamy of Pearl Harbor the American triumph at Midway naval operations in support of D Day and the greatest naval battle of all time Leyte Gulf The definitive book about naval power in the Second World War Richard Hough s masterpiece is essential reading for followers of Max Hastings and James Holland We are in Richard Hough s debt New York Times Utterly absorbing Financial Times

Those Who Have Borne the Battle James Wright, 2012-05-01 At the heart of the story of America s wars are our citizen soldiers those hometown heroes who fought and sacrificed from Bunker Hill at Charlestown to Pointe du Hoc in Normandy and beyond without expectation of recognition or recompense Americans like to think that the service of its citizen volunteers is and always has been of momentous importance in our politics and society But though this has made for good storytelling the reality of America s relationship to its veterans is far more complex In *Those Who Have Borne the Battle* historian and marine veteran James Wright tells the story of the long often troubled relationship between America and those who have defended her from the Revolutionary War to today shedding new light both on our history and on the issues our country and its armed forces face today From the beginning American gratitude to its warriors was not a given Prior to World War II the prevailing view was that as citizen soldiers the service of its young men was the price of citizenship in a free society Even Revolutionary War veterans were affectionately but only temporarily embraced as the new nation and its citizens had much else to do In time the celebration of the nation s heroes became an important part of our culture building to the response to World War II

where warriors were celebrated and new government programs provided support for veterans The greater transformation came in the wars after World War II as the way we mobilize for war fight our wars and honor those who serve has changed in drastic and troubling ways Unclear and changing military objectives have made our actions harder for civilians to stand behind a situation compounded by the fact that the armed forces have become less representative of American society as a whole Few citizens join in the sacrifice that war demands The support systems seem less and less capable of handling the increasing number of wounded warriors returning from our numerous and bewildering conflicts abroad A masterful work of history Those Who Have Borne the Battle expertly relates the burdens carried by veterans dating back to the Revolution as well as those fighting today s wars And it challenges Americans to do better for those who serve and sacrifice today **The Longest War** Jacobo Timerman,1982 An account that is critical of Israel s role in the Lebanon disintegration and particularly of the invasion of Lebanon in 1982 Storming the City Alec Wahlman,2015-10-15 In an increasingly urbanized world urban terrain has become a greater factor in military operations Simultaneously advances in military technology have given military forces sharply increased capabilities The conflict comes from how urban terrain can negate or degrade many of those increased capabilities What happens when advanced weapons are used in a close range urban fight with an abundance of cover Storming the City explores these issues by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid twentieth century Aachen 1944 Manila 1945 Seoul 1950 and Hue 1968 Alec Wahlman assesses each battle using a similar framework of capability categories and separate chapters address urban warfare in American military thought In the four battles across a wide range of conditions American forces were ultimately successful in capturing each city because of two factors transferable competence and battlefield adaptation The preparations US forces made for warfare writ large proved generally applicable to urban warfare Battlefield adaptation a strong suit of American forces filled in where those overall preparations for combat needed fine tuning From World War Two to Vietnam however there was a gradual reduction in tactical performance in the four battles *Simulation and Computational Red Teaming for Problem Solving* Jiangjun Tang,George Leu,Hussein A. Abbass,2019-10-24 An authoritative guide to computer simulation grounded in a multi disciplinary approach for solving complex problems Simulation and Computational Red Teaming for Problem Solving offers a review of computer simulation that is grounded in a multi disciplinary approach The authors present the theoretical foundations of simulation and modeling paradigms from the perspective of an analyst The book provides the fundamental background information needed for designing and developing consistent and useful simulations In addition to this basic information the authors explore several advanced topics The book s advanced topics demonstrate how modern artificial intelligence and computational intelligence concepts and techniques can be combined with various simulation paradigms for solving complex and critical problems Authors examine the concept of Computational Red Teaming to reveal how the combined fundamentals and advanced techniques are used successfully for solving and

testing complex real world problems This important book Demonstrates how computer simulation and Computational Red Teaming support each other for solving complex problems Describes the main approaches to modeling real world phenomena and embedding these models into computer simulations Explores how a number of advanced artificial intelligence and computational intelligence concepts are used in conjunction with the fundamental aspects of simulation Written for researchers and students in the computational modelling and data analysis fields Simulation and Computational Red Teaming for Problem Solving covers the foundation and the standard elements of the process of building a simulation and explores the simulation topic with a modern research approach *America in White, Black, and Gray* Klaus P. Fischer, 2007-05-30 Numerous studies on various aspects of the issues of the 1960s have been written over the past 35 years but few have so successfully integrated the many sided components into a coherent synthetic and reliable book that combines good storytelling with sound scholarly analysis
