**Overarching Greek Trends in European Philosophy** Marco Antonio Coronel Ramos,2021-08-16 This book is an enquiry into memory in the Western world Specifically memory is the framework of culture because it links the present to the past or tradition and projects it into the future For this reason any work focusing on memory involves a double challenge 1 to reveal the origin of concepts and 2 to glimpse the course of thoughts This is the case of the present volume in which the authors make several tastings of Europe s intellectual heritage by taking into account both the Greek origin of this legacy and its relevance for understanding the European philosophical heritage In particular these papers focus on the Aristotelian tradition the true keystone of Europe and on other currents of thought that have also played an essential role in the intellectual evolution of the Old Continent In the latter field there are contributions for instance on philosophical religious traditions such as Orphism or on certain fundamental aspects of Neoplatonism both in the Classical World and in Christian authors The volume concludes with various works on the survival of these intellectual trends from the Renaissance to the present day Consequently this work offers the opportunity to delve deeper into some of the aspects that define Western civilisation observed both from its origin and its evolution over the centuries The volume contains papers in Spanish Portuguese Italian and English Este libro es una indagaci n en la memoria del mundo occidental Espec ficamente la memoria es el armaz n de la cultura porque liga el presente al pasado o tradici n y lo proyecta al futuro Por ello toda obra centrada en la memoria entra a un doble reto 1 revelar el origen de los conceptos y 2 atisbar el rumbo de los pensamientos Este es el caso del presente volumen en el que realizan diversas catas en el patrimonio intelectual europeo Lo hace teniendo en cuenta tanto el origen griego de ese legado como su relevancia para comprender el acervo filos fico europeo En concreto se centra en la tradici n arist telica verdadera clave de b veda de Europa y en otras corrientes de pensamiento que tambi n han jugado un papel esencial en la evoluci n intelectual del viejo continente En ste ltimo mbito hay contribuciones por ejemplo sobre tradiciones filos fico religiosas como el orfismo o sobre determinados aspectos fundamentales del neoplatonismo en el mundo

el sico y en autores cristianos Concluye el volumen con diversos trabajos sobre la pervivencia de esas tendencias intelectuales desde el renacimiento hasta nuestros días En consecuencia esta obra ofrece la oportunidad de profundizar en algunos aspectos que definen nuestra civilización observados tanto desde su origen como desde su evolución a lo largo de los siglos **Technical Series Bulletin** United States.
