others are familiar high design that is costly to build that makes little contribution to the public realm highly profitable but seemingly identical cookie cutter dwellings with no sense of place and well planned neighborhoods full of generically designed unmarketable product types Differing roles languages and criteria for success shape these perspectives which in turn influence attitudes about housing regulation Real estate developers for example prefer projects that can be built as of right or by right meaning that they can be approved quickly because they meet all current planning zoning and building code requirements Design focused projects heretofore by design by contrast often require time to challenge existing regulatory codes pursuing discretionary modifications meant to maximize design innovation and development potential Meanwhile urban planners work to establish and mediate the threshold between by right and by design processes by setting housing standards and determining appropriate housing policy But just what is the right line between by right and by design By Right By Design provides a historical perspective conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production The heart of the book is a set of six cross disciplinary comparative case studies each examining a significant Los Angeles housing design precedent approved by variance and its associated development type approved as of right Each comparison tells a different story about the often hidden relationships among the three primary disciplines shaping the built environment some of which uphold and others of which transgress conventional disciplinary stereotypes

Across town Culver City home to the tech industry features blocks of futuristic architecture by Eric Owen Moss. The modernist homes by Richard Neutra and John Lautner as well as Frank Lloyd Wright's Hollyhock House are shown against dramatic backdrops of sky and sea. The visual sweep of this oversized book also encompasses the Los Angeles of film and television. Los Angeles is a city of dreams and Los Angeles Today is a glorious portrait of the city in its infinite variety. *California Dreaming* Neil Spiller, 2023-02-28 California has historically provided a fertile breeding ground for radical modes of architectural thinking practice and building which from the 1920s onwards was sparked by the presence of eminent migrant architects. It was also central to the birth of cool mid-century Modernism all in parallel with the intense concentration of design and experimentation in the film aerospace and tech industries. This AD issue explores the influential formal tropes generated in the nexus between Los Angeles and the Bay Area as well as the thriving theoretical preoccupations that have brought California's architects global attention. Between Hollywood and the Silicon Valley this unique context has nurtured and become the platform for those who not only build buildings around the world but have also founded and directed schools and educated emergent generations of architects. College of Architecture and Urban Planning, 2003. "Architecture, Design and Craft in Toronto 1900-1940" Alla Myzelev, 2017-07-05 Toronto the largest and one of the most multicultural cities in Canada boasts an equally interesting and diverse architectural heritage. Architecture Design and Craft in Toronto 1900-1940 tells a story of the significant changes in domestic life in the first 40 years of the twentieth century. Adopting a multidisciplinary approach to studies of residential spaces the author examines how questions of modernity and modern living influenced not only architectural designs but also interior furnishings modes of transportation and ways to spend leisure time. The book discusses several case studies some of which are known both locally and internationally for example Casa Loma while others such as Guild of All Arts or Sherwood have been virtually unstudied by historians of visual culture. The overall goal of the book is to put Toronto on the map of scholars of urban design and architecture and to uncover previously unknown histories of design craft and domesticity in Toronto. This study will be of interest not only to the academic community namely architects designers craftspeople and scholars of these disciplines along with social historians but also the general public interested in local history and or visual culture. **Almanac of Architecture & Design 2006** James P.
