Losing Control Global Security In The Twenty First Century:

Losing Control Paul Rogers, 2000 A radical analysis of global security which argues that elite societies cannot maintain their power and position in an increasingly divided and environmentally constrained world *Losing Control* Paul Rogers, 2010-04-15 When *Losing Control* was first published a decade ago it was years ahead of its time Its argument was simple the real causes of global insecurity were the widening socio economic divide global marginalization and environmental limitations especially climate change and conflict over energy resources Paul Rogers one of the most original thinkers on international security pointed to a world in which irregular warfare from the margins would prevent powerful states from maintaining their position He even predicted accurately how the United States would respond to a catastrophic attack The new edition brings the whole analysis right up to date arguing persuasively that the world s elite cannot maintain control and that a far more emancipatory and sustainable approach to global security has to be developed **Global Security in the Twenty-first Century** Sean Kay, 2011-08-16 This thoroughly updated edition of *Global Security in the Twenty first Century* offers a balanced introduction to contemporary security dilemmas in the world Sean Kay assesses the impact of the global economic crisis on international security and considers how the range of thinking about power and peace has evolved in relation to major flashpoints including in the Middle East Asia and Eurasia Kay focuses especially on the implications of the election of Barack Obama and the changing role of the United States in global security He builds on the first edition s emphasis on the role of trade and technology the militarization of space the privatization of security the use of sanctions ethnic conflict and transnational crime This edition goes even farther to incorporate traditional thinking about national security in the context of human rights democracy population health environment energy and especially education Writing in an engaging style Kay integrates traditional and emerging challenges in one easily accessible study that gives readers the tools they need to develop a thoughtful and nuanced understanding of global security **Losing Control** Paul Rogers, 2010-03-03 When *Losing Control* was first published a decade ago it was years ahead of its time Its argument was simple the real causes of global insecurity were the widening socio economic divide global marginalisation and environmental limitations especially climate change and conflict over energy resources Paul Rogers one of the most original thinkers on international security pointed to a world in which irregular warfare from the margins would prevent powerful states from maintaining their position He even predicted accurately how the United States would respond to a catastrophic attack The new edition brings the whole analysis right up to date arguing persuasively that the world s elite cannot maintain control and that a far more emancipatory and sustainable approach to global security has to be developed **The Palgrave Encyclopedia of Global Security Studies** , 2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non traditional Security and their relation to other scholarly fields and aspects of real world issues

in the contemporary geopolitical world **Critical security in the Asia-Pacific** Anthony Burke, Matt McDonald, 2021-06-15 In the wake of 9 11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that focuses on the security welfare and emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable

Rethinking World Politics Philip G. Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that

contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope *Rethinking World Politics* is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world Environmental Security Rita Floyd, Richard Matthew, 2013-01-04 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non-existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography American Journal of Islamic Social Sciences 21:3 Christopher Allen, Tahir Abbas, Halil Ibrahim Yenigun, Nancy Gallagher, Nancy L. Stockdale, Jasmin Zine, The American Journal of Islamic Social Sciences AJISS is an interdisciplinary journal that publishes a wide variety of scholarly research on all facets of Islam and the Muslim world anthropology economics history philosophy and metaphysics politics psychology religious law and traditional Islam Submissions are subject to a blind peer review process *Security and Environment in the Mediterranean* Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F.

Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century

Corporate Security Surveillance Richard J. Chasdi, 2024-03-05 In a world of globalization and technological change terrorism continues to pose grave threats not only to more traditional targets such as civilians and government targets but according to many experts increasingly to multinational corporations and other international economic enterprises This book broadens the understanding of the threats posed to the private sector thereby helping business executives in charge of security affairs prepare for new threats and unconventional threats in a continuously evolving world Chasdi s Terrorist Assault Business Vulnerability Index TABVI now provides C class executives with a way to measure potential host country and host country industry vulnerability and thus contributes a critical new standard to help appraise where and when MNCs and other international enterprises should marshal Foreign Direct Investment FDI and other resources In addition his statistical findings about different country operational environments work to frame TABVI findings and provide in depth understandings of risk in several different potential host countries While the focus is on traditional terrorist groups and criminal syndicalist organizations that use terrorism in particular developing world host countries Chasdi s research also informs the business community about the context of political issues of contention defined by terrorist groups and their constituent supporters Business leaders government officials at national and local government levels the academic community and the media benefit from ideas proposed in this book Brian M Jenkins writes a carefully reasoned comprehensive and insightful Foreword that describes the importance of this topic about Chasdi he writes I am an admirer of his uniquely imaginative approaches and always rigorous analysis His work is invariably intellectually challenging and thought provoking Read on

politics and culture determine levels of stability within regions around the world
