Kitson, 2004-09-02 In 1768 Captain James Cook made the most important scientific voyage of the eighteenth century. He was not alone scores of explorers like Cook travelling in the name of science brought new worlds and new peoples within the horizon of European knowledge for the first time. Their discoveries changed the course of science. Old scientific disciplines such as astronomy and botany were transformed new ones like craniology and comparative anatomy were brought into being. Scientific disciplines in turn pushed literature of the period towards new subjects forms and styles. Works as diverse as Mary Shelley's *Frankenstein* and Wordsworth's *Excursion* responded to the explorers and scientists' latest discoveries. This wide ranging and well illustrated study shows how literary Romanticism arose partly in response to science's appropriation of explorers' encounters with foreign people and places and how it in turn changed the profile of science and exploration **United Empire**, 1923 *The Roth Family, Anthropology, and Colonial Administration* Russell McDougall, Iain Davidson, 2016-06-03 This volume serves the reader as a family biography a slice of the English colonial history and an important introduction to the history of anthropology.
