Mapping Benjamin The Work Of Art In The Digital Age Writing Science:

Mapping Benjamin Hans Ulrich Gumbrecht, Michael Marrinan, 2003 Since its publication in 1936 Walter Benjamin's Artwork essay has become a canonical text about the status and place of the fine arts in modern mass culture Benjamin was especially concerned with the ability of new technologies notably film sound recording and photography to reproduce works of art in great number Benjamin could not have foreseen the explosion of imagery and media that has occurred during the past fifty years Does Benjamin's famous essay still speak to this new situation That is the question posed by the editors of this book to a wide range of leading scholars and thinkers across a spectrum of disciplines in the humanities The essays gathered here do not hazard a univocal reply to that question rather they offer a rich wide ranging critique of Benjamin's position that refracts and reflects contemporary thinking about the ethical political and aesthetic implications of life in the digital age

Understanding Interactive Digital Narrative Hartmut Koenitz, 2023-03-23 This remarkably clearly written and timely critical evaluation of core issues in the study and application of interactive digital narrative IDN untangles the range of theories and arguments that have developed around IDN over the past three decades Looking back over the past 30 years of theorizing around interactivity storytelling and the digital across the fields of game design game studies media studies and narratology as well as interactive documentary and other emerging forms this text offers important and insightful correctives to common misunderstandings that pervade the field This book also changes the perspective on IDN by introducing a comprehensive conceptual framework influenced by cybernetics and cognitive narratology addressing limitations of perspectives originally developed for legacy media forms Applying its framework the book analyzes successful works and lays out concrete design advice providing instructors students and practitioners with a more precise and specific understanding of IDN This will be essential reading for courses in interactive narrative interactive storytelling and game writing as well as digital media more generally

Playing with Something That Runs Mark J. Butler, 2014-06-02 Winner of the 2015 PMIG Outstanding Publication Award from the Society of Music Theory The DJs and laptop performers of electronic dance music use preexistent elements such as vinyl records and digital samples to create fluid dynamic performances These performances are also largely improvised evolving in response to the demands of a particular situation through interaction with a dancing audience Within performance musicians make numerous spontaneous decisions about variables such as which sounds they will play when they will play them and how they will be combined with other sounds Yet the elements that constitute these improvisations are also fixed in certain fundamental ways performances are fashioned from patterns or tracks recorded beforehand and in the case of DJ sets these elements are also physical objects vinyl records In *Playing with Something That Runs* author Mark J Butler explores these improvised performances revealing the ways in which musicians utilize seemingly invariable prerecorded elements to create novel improvisations Based on extensive interviews with musicians in their studios as well as in depth studies of particular mediums of performance including both DJ and laptop sets Butler illustrates the ways

in which technologies both material and musical are used in performance and improvisation in order to make these transformations possible An illuminating look at the world of popular electronic music performance *Playing with Something that Runs* is an indispensable resource for electronic dance musicians and fans as well as scholars and students of popular music *The Cinematic Life of the Gene* Jackie Stacey, 2010-04-02 A leading feminist film theorist argues that the cinema

animates the tropes of and enacts our fears about cloning and other kinds of genetic engineering **Digital Material** Ann-Sophie Lehmann, Joost Raessens, Mirko Tobias Schäfer, Marianne Boomen, 2025-10-01 Three decades of societal and cultural alignment of new media have yielded a host of innovations trials and problems accompanied by versatile popular and academic discourse New Media Studies crystallized internationally into an established academic discipline and this begs the question where do we stand now Which new questions are emerging now that new media are being taken for granted and which riddles are still unsolved Is contemporary digital culture indeed all about you the participating user or do we still not really understand the digital machinery and how this constitutes us as you The contributors to the present book all employed in teaching and researching new media and digital culture assembled their digital material into an anthology covering issues ranging from desktop metaphors to Web 2.0 ecosystems from touch screens to blogging and e learning from role playing games and cybergothic music to wireless dreams Together the contributions provide a showcase of current research in the field from what may be called a digital materialist perspective A compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society Listening Devices Jens Gerrit Papenburg, 2023-05-04 From 1940 to 1990 new machines and devices radically changed listening to music Small and large single records new kinds of jukeboxes and loudspeaker systems not only made it possible to playback music in a different way they also evidence a fundamental transformation of music and listening itself Taking the media and machines through which listening took place during this period *Listening Devices* develops a new history of listening Although these devices were and often still are easily accessible up to now we have no concept of them To address this gap this volume proposes the term listening device In conjunction with this concept the book develops an original and fruitful method for exploring listening as a historical subject that has been increasingly organized in relation to technology Case studies of four listening devices are the points of departure for the analysis which leads the reader down unfamiliar paths traversing the popular sound worlds of 1950s rock n roll culture and the disco and club culture of the 1970s and 1980s Despite all the characteristics specific to the different listening devices they can nevertheless be compared because of the fundamental similarities they share they model and manage listening they actively mediate between the listener and the music heard and it is this mediation that brings both listener and the music listened to into being Ultimately however the intention is that the listening devices themselves should not be heard so that the music they playback can be heard Thus they take the history of listening to its very limits and confront it with its other a history of non listening The book proposes listening device as a key concept for sound studies

popular music studies musicology and media studies With this conceptual key a new productive understanding of past music and sound cultures of the pre digital era can be unlocked and not least of the listening culture of the digital present

American Book Publishing Record, 2003 **Critical Digital Studies** Arthur Kroger, Marilouise Kroger, 2008-01-01 Since its initial publication *Critical Digital Studies* has proven an indispensable guide to understanding digitally mediated culture Bringing together the leading scholars in this growing field internationally renowned scholars Arthur and Marilouise Kroger present an innovative and interdisciplinary survey of the relationship between humanity and technology The reader offers a study of our digital future a means of understanding the world with new analytic tools and means of communication that are defining the twenty first century The second edition includes new essays on the impact of social networking technologies and new media A new section New Digital Media presents important new articles on topics including hacktivism in the age of digital power and the relationship between gaming and capitalism The extraordinary range and depth of the first edition has been maintained in this new edition *Critical Digital Studies* will continue to provide the leading edge to readers wanting to understand the complex intersection of digital culture and human knowledge **Mapping Benjamin** Hans Ulrich

Gumbrecht, Michael Marrinan, 2003 Since its publication in 1936 Walter Benjamin's Artwork essay has become a canonical text about the status and place of the fine arts in modern mass culture Benjamin was especially concerned with the ability of new technologies notably film sound recording and photography to reproduce works of art in great number Benjamin could not have foreseen the explosion of imagery and media that has occurred during the past fifty years Does Benjamin's famous essay still speak to this new situation That is the question posed by the editors of this book to a wide range of leading scholars and thinkers across a spectrum of disciplines in the humanities The essays gathered here do not hazard a univocal reply to that question rather they offer a rich wide ranging critique of Benjamin's position that refracts and reflects contemporary thinking about the ethical political and aesthetic implications of life in the digital age Deutsche Texte des

Mittelalters zwischen Handschriftennähe und Rekonstruktion Martin Schubert, 2011-12-22 Der Band dokumentiert die auf der Berliner Editionstagung von 2004 lebhaft diskutierten Fragen des Verhältnisses von Überlieferung und Edition von Handschriften und rekonstruiertem Text In Überblicks und Projektbeiträgen vom Althochdeutschen bis zum spätmittelalterlichen Fastnachtspiel werden Fragen der Textkonstitution und des Stellenwerts der Handschriftenzeugnisse erörtert und ein breites Spektrum der anhand des jeweiligen Überlieferungsbefunds zu wählenden Editionstypen aufgefächert Ergänzend treten Beiträge zu den editorischen Paratexten und zu elektronischen Editionsformen hinzu The British National Bibliography Arthur James Wells, 2007 **Interdiscipline** Petar Ramadanovic, 2021-11-29 This book brings together two

different discussions on the value of the humanities and a broader debate on interdisciplinary scholarship in order to propose a new way beyond current threats to the humanities Petar Ramadanovic offers nothing short of a drastic rehaul of our approaches to literary scholarship the humanities and university systems Beginning with an analysis of what is often referred

to as the crises in the humanities the author looks at the specifics of literary studies but also issues around working conditions for academics From precarity and pay conditions to peer review the book has practical as well as theoretical implications that will resonate throughout the humanities While most books defending the humanities emphasize the uniqueness of the subject or area Ramadanovic does the opposite emphasizing the need for interdisciplinarity and combined knowledge This proposal is then fully explored through literary studies and its potential throughout the humanities and beyond into the sciences Interdiscipline is not just a defense of literature and the humanities it offers a clear and inspiring pathway forwards drawing on all disciplines to show their cultural and social significance The book is important reading for all scholars of literary studies and also throughout the humanities *Forthcoming Books* Rose Arny,2003 **Sign Here! F. C. J. Ketelaar**,2006 *Sign Here Handwriting in the Age of New Media* features a number of articles from different fields reaching from cultural and media studies to literature film and art and from philosophy and information studies to law and archival studies Questions addressed in this book are Will handwriting disappear in the age of new digital media What happens to important cultural and legal concepts such as original copy authenticity reproducibility uniqueness and iterability Where is the writing hand to be located if handwriting is performed not immediately by hand but when it is re mediated by electronic or artistic media Sonja Neef is junior professor of European Media and Culture at the Bauhaus University Weimar Germany Jos van Dijck is Professor of Media and Culture at the University of Amsterdam and chair of the Media Studies department Eric Ketelaar is Professor of Archival Science in the Department of Mediastudies of the University of Amsterdam and Honorary Professor in the Faculty of Information Technology at Monash University Melbourne *Sign Here Handwriting in the Age of New Media* is the first part in the series **Transformations in Art and Culture** **Deutsche Texte des Mittelalters zwischen Handschriftennähe und Rekonstruktion** ,2005 **Art as Organism** Charissa N. Terranova,2015-10-10 In this groundbreaking book Charissa Terranova unearths a forgotten narrative of modernism which charts the influence that biology General Systems Theory and cybernetics had on art in the twentieth century From kinetic and interactive art to early computer art and installations spanning an entire city she shows that the digital image was a rich and expansive artistic medium of modernism This book links the emergence of the digital image to the dispersion of biocentric aesthetic philosophies developed by Bauhaus pedagogue Laszlo Moholy Nagy from 1920s Berlin to the Massachusetts Institute of Technology in the 1970s It uncovers seminal but overlooked references to biology the organism feedback loops emotions and the Gestalt along with an intricate genealogy of related thinkers across disciplines Terranova interprets anew major art movements such as the Bauhaus Op Art and Experiments in Art and Technology E A T by referencing contemporary insights from architects embryologists electrical engineers and computer scientists among others This book reveals the complex connections between visual culture science and technology that comprise the deep history of twentieth century art **Bibliografisch Repertorium Van de Wijsbegeerte** ,2004 **The Writers Directory** ,2013

Error, Ambiguity, and Creativity Sita Popat, Sarah Whatley, 2020-06-30 This book offers a set of eleven discipline specific chapters from across the arts humanities psychology and medicine Each contributor considers the creative potential of error and or ambiguity defining these terms in the particular context of that discipline and exploring their values and applications Themes include error in choreography poetry media art healthcare psychology critical typography and mixed reality performance The book emerges from a core question of how dance research and HCI can inform each other through consideration of error ambiguity and messiness as methodological tools The digital age had heralded the possibility that error could be eradicated by the logic of computers but several chapters focus on glitch in arts practices that exploit errors in computer programmes or even create programmes specifically to produce errors Together the chapters explore how error can take us somewhere different or somewhere new to develop a new more interesting way of working Geofusion:
Mapping Of The 21st Century Norbert Csizmadia, 2020-03-26 Geofusion is an exciting journey around the main issues of the 21st century This is a book with roadmaps that show the complexity of our world the interconnections between places people schools of thoughts and disciplines Starting with a geographical frame of reference readers are taken through the global geo economic trends and likely future scenarios as well as the driving forces of the new world economy The book points to the importance of cities as the power centers for the multidimensional global network of the 21st century Geofusion is a thought provoking guidebook to our interconnected world
