Market Economy and Civil Society in Hungary C. M. Hann, 1990 First Published in 1990 Routledge is an imprint of Taylor Francis an informa company Special issue on market economy and civil society in Hungary C. M. Hann, 1990 *Oikos and Market* Stephen Gudeman, Chris Hann, 2015-06-01 Self sufficiency of the house is practiced in many parts of the world but ignored in economic theory just as socialist collectivization is assumed to have brought household self sufficiency to an end The ideals of self sufficiency however continue to shape economic activity in a wide range of postsocialist settings This volume s six comparative studies of postsocialist villages in Eastern Europe and Asia illuminate the enduring importance of the house economy which is based not on the market but on the order of the house These formations show that economies depend not only on the macro institutions of markets and states but also on the micro institutions of families communities and house economies often in an uneasy relationship **Hungary since Communism** Gyorgy Bogel, Vincent Edwards, Marian Wax, 1997-01-29 This accessible account of the post communist transformation of Hungarian companies raises several important questions How did the transition from planned economy to free market work in practice What are the main issues now facing Hungarian business The authors look at the ways in which a cross section of Hungarian companies and their managers have faced the challenges of the free market system Containing several contemporary case studies and based upon a major research project this book provides a fascinating insight into the challenges facing modern Hungary **Market Reform and Civil Society** Jude Howell, 1994 Youth and the State in Hungary Laszlo Kurti, 2002-07-20 Youth and the State in Hungary takes as its focus the nature of Hungary s youth movements over the last seventy years In a detailed ethnographic study Laszlo Kurti examines the lives of youth workers in the Csepel district of Budapest in the context of the wider political and economic transformations witnessed during the twentieth century Kurti follows State Youth relations from the inter war capitalism that made peasants into workers through the post war state socialism Stalinism and after to the reintroduction of capitalism in 1990 This time frame allows an exploration of the transformations and dilemmas of youth class gender and ethnicity as they develop across time In the course of this study two main themes emerge the reproduction of class in youth culture across shifting socio economic conditions and the mobilisation of youth movements in resistance to the state Youth and the State in Hungary challenges the orthodox equation of youth and resistance by arguing that youth mobilisation has in fact served the interests of the state Nevertheless there remains a genuine space for resistance and contestation in the reproduction of youth culture *Explorations in Economic Anthropology* Deema Kaneff, Kirsten W. Endres, 2021-07-16 At a time of rising global economic precarity and social inequality the field of economic anthropology offers solutions through the study of local and contextualized economic practices This book is made up of an exciting collection of succinct essays authored by leading scholars primarily from the field of economic anthropology but also featuring contributions from sociology and history The chapters engage with debates at the cutting

Hungary presents an interesting case study for a number of reasons. The communist regime that took power after World War II had the proclaimed goal of eliminating the abusive inequalities of the old regime and creating an egalitarian society; it accordingly introduced numerous measures intended to favor the advancement of people with working class backgrounds. That to some extent these policies worked cannot be disputed, but over time did they simply replace one privileged class with another? What happened during the communist reform era of the late 1970s and 1980s when Hungary went much further along the path of decentralizing the economy than any other Eastern bloc country? What happened in the postcommunist era? And what difference did such age-old liabilities as being Jewish or female make? There is as much scholarly debate over how to address these questions in an intellectually rigorous way as there is over the answers to them. This study aims to contribute to the debate by analyzing random samples of both elites and the general population and by carrying out comparisons across presocialist, socialist, and postsocialist society. Its main methodological goal is to explore the implications of carefully distinguishing between the effects of socialist reform on the distribution of inequality from its effects on the underlying rules by which inequality is allocated.

The areas investigated include the challenge of internationalization to the nation-state and to national identities, the contested nature of citizenship in relation to poverty, work, and welfare, the implications of gender inequality, and the potential for new conceptions of citizenship in response to culture.
