Moral Problems In Medicine:

Moral Problems in Medicine Samuel Gorovitz, 1976 This book is designed primarily to provide readings for a consideration of the moral issues in medicine from a philosophical point of view There are two basic alternatives in structuring a philosophical course in medical ethics One is to divide the course according to medically conceived topics such as organ transplantation genetic engineering euthanasia etc Such an approach is wholly viable but we have preferred not to adopt it here Rather we have organized the book primarily on the basis of more philosophically inspired categories Thus our headings invoke such notions of paternalism truth social justice etc

Moral Problems in Medicine Michael Palmer, 2005-09 In His Important New Book Michael Palmer Assuming No Prior Philosophical knowledge on the part of the reader examines the controversial issues of euthanasia abortion and experimentation on humans and animals as well as the right to self determination and the limits of confidentiality

Morals and Medicine Joseph F. Fletcher, 2015-03-08 In *Morals and Medicine* a leading Protestant theologian comes to grips with the problems of conscience raised by new advances in medical science and technology They arise as issues at the start or making of a life in preserving its health and in facing its death They are the problems of Everyman some are new problems of conscience such as artificial insemination some are old problems in new dimensions such as euthanasia Modern medicine provides such a high degree of control over health and vital processes that men must inevitably shoulder the burden of intelligent decision and shoulder it as rationally as possible Thus far only Roman Catholic moralists have worked out a coherent ethics of medical care *Morals and Medicine* is a new and independent analysis of the morals of life and death striking out along the line of the values of personality rather than of mere physiological life itself It offers a modern and at the same time Christian concept of right and wrong for all who are involved the patient the doctor and nurse the pastor and the family and friends Originally published in 1954 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Moral Dilemmas in Modern Medicine Michael Lockwood, 1985 A really good collection a sustained and successful attempt to throw some light on extremely difficult problems __ New Society

Ethical Issues in Family Medicine Ronald J. Christie, C. Barry Hoffmaster, 1986 While ethicists have directed much attention to controversial biomedical issues including euthanasia abortion and genetic engineering they have largely ignored the less obvious but more pervasive everyday ethical problems faced by family physicians *Ethical Issues in Family Medicine* addresses these problems offering an ethics that reflects the distinctive features of family practice and helping family physicians to appreciate the

extent to which ethical issues influence their practice *The Nature of Suffering and the Goals of Medicine* Eric J. Cassell
Clinical Professor of Public Health Cornell University Medical College,1991-10-03 The Nature of Suffering underscores the change that is taking place in medicine from a basic concern with disease to a greater focus on the sick person Cassell centers his discussion on the problem of suffering because he says its recognition and relief are a test of the adequacy of any system of medicine He describes what suffering is and its relationship to the sick person bodies do not suffer people do An exclusive concern with scientific knowledge of the body and disease therefore impedes an understanding of suffering and diminishes the care of the suffering patient The growing criticism that medicine is not sufficiently humanistic does not go deep enough to provide a basis for a new understanding of medicine New concepts in medicine must have their basis in its history and in the development of ideas about disease and treatment Cassell uses many stories about patients to demonstrate that despite the current dominance of science and technology there can be no diagnosis search for the cause of the patient s disease prognostication or treatment without consideration of the individual sick person Recent trends in medicine and society Cassell believes show that it is time for the sick person to be not merely an important concern for physicians but the central focus of medicine He addresses the exciting problems involved in such a shift In this new medicine doctors would have to know the person as well as they know the disease What are persons however and how are doctors to comprehend them The kinds of knowledge involved are varied including values and aesthetics as well as science In the process of knowing the experience of patient and doctor move to center stage He believes that the exploration of the person will engage medicine in the 21st century just as understanding the body has occupied the last hundred years Christian Ethics and Contemporary Moral Problems Michael C. Banner,1999-09-28 This book addresses such key ethical issues as euthanasia the environment biotechnology abortion the family sexual ethics and the distribution of health care resources Michael Banner argues that the task of Christian ethics is to understand the world and humankind in the light of the credal affirmations of the Christian faith and to explicate this understanding in its significance for human action through a critical engagement with the concerns claims and problems of other ethics He illustrates both the distinctiveness of Christian convictions in relation to the above issues and also the critical dialogue with practices based on other convictions which this sense of distinctiveness motivates but does not prevent The book s importance lies in its attempt to show the crucial difference which Christian belief makes to an understanding of these issues whilst at the same time demonstrating some of the weaknesses and confusions of certain popular approaches to them The Nature of Suffering and the Goals of Medicine Eric J. Cassell,2004-03-25 This is a revised and expanded edition of a classic in palliative medicine originally published in 1991 With three added chapters and a new preface summarizing our progress in the area of pain management this is a must hve for those in palliative medicine and hospice care The obligation of physicians to relieve human suffering stretches back into antiquity But what exactly is suffering One patient with metastatic cancer of the stomach from which he knew he would shortly

die said he was not suffering Another someone who had been operated on for a minor problem in little pain and not seemingly distressed said that even coming into the hospital had been a source of pain and not suffering With such varied responses to the problem of suffering inevitable questions arise Is it the doctor's responsibility to treat the disease or the patient And what is the relationship between suffering and the goals of medicine According to Dr Eric Cassell these are crucial questions but unfortunately have remained only queries void of adequate solutions It is time for the sick person Cassell believes to be not merely an important concern for physicians but the central focus of medicine With this in mind Cassell argues for an understanding of what changes should be made in order to successfully treat the sick while alleviating suffering and how to actually go about making these changes with the methods and training techniques firmly rooted in the doctor's relationship with the patient Dr Cassell offers an incisive critique of the approach of modern medicine Drawing on a number of evocative patient narratives he writes that the goal of medicine must be to treat an individual's suffering and not just the disease In addition Cassell's thoughtful and incisive argument will appeal to psychologists and psychiatrists interested in the nature of pain and suffering

Ethical Problems in Emergency Medicine Peter Rosen, James Adams, Arthur R. Derse, Shamai Grossman, Richard Wolfe, 2012-06-13 This book is designed to consolidate the relevant literature as well as the thoughts of professionals currently working in the field into a practical and accessible reference for the emergency medical technician student nurse resident and attending emergency physician Each chapter is divided into four sections case presentation discussion review of the current literature and recommendations Designed to serve simultaneously as a learning and reference tool each chapter begins with a real case that was encountered in an ED setting The case presentation is followed by a short discussion of the case as if at a morbidity and mortality conference by a panel of experienced attending physicians explaining how they would approach the ethical dilemmas associated with the case and a review of the existing literature

Moral Dilemmas in Medicine Alastair V. Campbell, 1972 *A Short History of Medical Ethics* Albert R. Jonsen, 2000 A physician says I have an ethical obligation never to cause the death of a patient another responds My ethical obligation is to relieve pain even if the patient dies The current argument over the role of physicians in assisting patients to die constantly refers to the ethical duties of the profession References to the Hippocratic Oath are often heard Many modern problems from assisted suicide to accessible health care raise questions about the traditional ethics of medicine and the medical profession However few know what the traditional ethics are and how they came into being This book provides a brief tour of the complex story of medical ethics evolved over centuries in both Western and Eastern culture It sets this story in the social and cultural contexts in which the work of healing was practiced and suggests that behind the many different perceptions about the ethical duties of physicians certain themes appear constantly and may be relevant to modern debates The book begins with the Hippocratic medicine of ancient Greece moves through the Middle Ages Renaissance and Enlightenment in Europe and the long history of Indian and Chinese medicine ending as the problems raised modern medical science and technology

challenge the settled ethics of the long tradition Ethical Issues in Preventive Medicine S. Doxiadis, 2012-12-06 The first suggestions and exchange of ideas for this Workshop began about two years ago when at the invitation of Professor E Bennett Director of Health and Safety of the Commission of the European Communities and Professor W W Holland of the Panel of Social Medicine and Epidemiology of the EEC I asked the Panel to sponsor a project for the study of Ethical Issues in Preventive Medicine The Panel gave its approval and support and asked Dr L Karhausen Dr R Blaney and me to undertake the planning Since then we have had several meetings in Brussels and have added Professor Heleen Terborgh Dupuis and Mrs Susie Stewart to our small planning team The Planning Committee invited many experts to collaborate with us on the project and as can be seen from the list of participants they represent many scientific disciplines and many countries About a year ago we also asked for the help and sponsorship of the NATO Science Council which was generously given The culmination of our efforts was the Workshop held in Athens in January 1985 the proceedings of which are contained in the present book The members of the Planning Committee and the participants at the Workshop would like to express thanks to Mr H Durand Secretary General for NATO Scientific Affairs and Dr M di Lullo Programme Director of N A T O Scientific Affairs and to Professor Bennett and Professor Holland for all the moral and financial support they have given to this project
