major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroot movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time More Robert M. Roberto J. Flores,2020-05-26 Speaking Private Authority The Construction of Sustainability in Forests and Fisheries expands upon current understandings of the emergent global phenomenon that is private authority As private authority is becoming increasingly important in the conduct of global governance broadening our collective understanding of it will prove beneficial Roberto J Flores argues that private actors are not simply outgrowths of existent social structures or material conditions rather they are purposive agents strategically pursuing an agenda Therefore explaining private authority requires an examination of the constitutive elements that underlie this social phenomenon to which the author applies an analytical framework that combines social network theory with discourse analysis The author applies these tools to two cases taken from the environmental sector forests and fisheries and finds that as environmental politics takes on an increasingly networked character the actors that are best able to generate and wield private authority are those that strategically place themselves in between networks through the construction of discursive nodal points around which competing actors are forced to converge at the level of identity The case studies specifically look at how particular actors leveraged construction of the sustainable development concept in order to strategically place themselves in advantageous positions for exercising private authority *Activists beyond Borders* Margaret E. Keck,Kathryn A. Sikkink,2014-02-15 In *Activists beyond Borders*

Margaret E Keck and Kathryn Sikkink examine a type of pressure group that has been largely ignored by political analysts networks of activists that coalesce and operate across national frontiers Their targets may be international organizations or the policies of particular states Historical examples of such transborder alliances include anti slavery and woman suffrage campaigns In the past two decades transnational activism has had a significant impact in human rights especially in Latin America and advocacy networks have strongly influenced environmental politics as well The authors also examine the emergence of an international campaign around violence against women **Environmental Politics and Policy,**

the contributors include well known journalist Roy Beck activist civil servant Leon Kolankiewicz environmental scholar Michael E Kraft historian Martin V Melosi and political scientist David Vogel This volume was originally published as a special issue of The Journal of Policy History
