Care of the Mentally Disordered Offender in the Community Alec Buchanan, Lisa Wootton, 2017-10-05. This revised and updated edition of *Care of the Mentally Disordered Offender in the Community* provides a comprehensive evidence-based guide to theory and practice. The social and clinical context within which mental health care is provided to offenders in community settings has changed significantly in recent years. An increasing proportion of all mental health care is provided in the community, and our knowledge of the links between violence and mental illness has advanced. Existing psychological and pharmacological treatments have been refined, and new treatments have been introduced. Epidemiological and intervention-based research has evaluated these changes and suggested new avenues for clinical development. Over three sections, the second edition of *Care of the Mentally Disordered Offender in the Community* explores the key areas of the field. Part 1 describes the social, administrative, and clinical context within which care is now given. Part 2 discusses treatment and the evaluation of violence risk when determining the most appropriate treatment. Part 3 explores psychiatric services and their relationship with other agencies. The text has been updated to cover recent developments in theory and practice. New chapters have been added that cover US provision for people with mental disorders leaving prison, the community management of sexual offenders, the relationship between care and coercion, and the treatment of personality disorders. Written by a global team of experts, the book provides critical insights into the social, clinical, and institutional aspects of an increasingly important part of psychiatric community care.
