The Lords of Tikal Peter D. Harrison, 2000 The Maya metropolis of Tikal was once one of the greatest cities in the world and today it has become one of the most visited Maya sites Drawing upon more than thirty years of excavation and research Harrison gives a vivid account of its turbulent history The city served as a major center of trade and as an architectural style setter for the central Peten region of the Maya Lowlands The apogee was achieved between A D 692 and 800 under the reigns of three generations of the Jaguar Claw clan whose ruling lords built the Great Temples that symbolize the character and individuality of the city Making full use of the recent breakthroughs in translating the Maya s hieroglyphic record Harrison summarizes what is known to date of this mysterious city and its rulers From publisher description [Handbook to Life in the Ancient Maya World](#) Lynn V. Fitzsimmons, 2010-01-01 Like their regal counterparts in societies around the globe ancient Maya rulers departed this world with elaborate burial ceremonies and lavish grave goods which often included ceramics red pigments earflares stingray spines jades pearls obsidian blades and mosaics Archaeological investigation of these burials as well as the decipherment of inscriptions that record Maya rulers funerary rites have opened a fascinating window on how the ancient Maya envisaged the ruler s passage from the world of the living to the realm of the ancestors Focusing on the Classic Period AD 250 900 James Fitzsimmons examines and

compares textual and archaeological evidence for rites of death and burial in the Maya lowlands from which he creates models of royal Maya funerary behavior Exploring ancient Maya attitudes toward death expressed at well known sites such as Tikal Guatemala and Copan Honduras as well as less explored archaeological locations Fitzsimmons reconstructs royal mortuary rites and expands our understanding of key Maya concepts including the afterlife and ancestor veneration

Substance of the Ancient Maya Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 Substance of the Ancient Maya Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the relationship between the living and the realm of the supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and

beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past

Approaches to Monumental Landscapes of the Ancient Maya Brett A. Houk, Barbara Arroyo, Terry G. Powis, 2019-12-11 This volume brings together a wide spectrum of new approaches to ancient Maya studies in an innovative exploration of how the Preclassic and Classic Maya shaped their world Moving beyond the towering temples and palaces typically associated with the Maya civilization contributors present unconventional examples of monumental Maya landscapes Featuring studies from across the central Maya lowlands Belize and the northern and central Maya highlands and spanning over 10 000 years of human occupation in the region these chapters show how the word monumental can be used to describe natural and constructed landscapes political and economic landscapes and ritual and sacred landscapes Examples include a massive system of aqueducts and canals at the Kaminaljuyu site a vast arena designed for public spectacle at Chan Chich and even the complex realms of Maya cosmology as represented by the ritual cave at Las Cuevas By including physical conceptual and symbolic ways monumentality pervaded ancient Maya culture this volume broadens traditional understandings of how the Maya interacted with their environment and provides exciting analytical perspectives to guide future study A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase

White Roads of the Yucatán Justine M. Shaw, 2008 Maya sacbeob or raised white roads are often considered a single class of features with a sole purpose In this first systematic examination of their functions meanings arrangements and construction styles Justine Shaw reveals that these causeways served a variety of cultural and natural functions In White Roads of the Yucatán author Justine Shaw presents original field data collected with the Coahuah Regional

Archaeological Survey at two ancient Maya sites Ichmul and Yo okop Both centers chose to invest enormous resources in the construction of monumental roadways during a time of social and political turmoil in the Terminal Classic period Shaw carefully examines why it was at this point and no other that the settlements made such a decision She argues that both settlements used the sacbeob as a method of socially integrating the largest most diverse and dispersed population in the Cochuah region She further demonstrates that their use of the sacbeob in concert with other innovative strategies allowed Ichmul and Yo okop to outlast many of the sites that they may have sought to emulate and to flourish during a time of tremendous sociopolitical and economic change In addition to her detailed discussion of these two sites Shaw provides an exhaustive review of the literature of Maya sacbeob archaeology describing various interpretations of construction features and variability This synthetic and interpretive treatment will aid researchers working on a variety of complex civilizations with road systems as well as those interested in core periphery relationships cultural collapse and social integration
