## **Methuselahs Gift:**

**Methuselah's Gift** Mary Elizabeth Edgren,1994-08-01      New Methuselahs John K. Davis,2024-03-19 An examination of the ethical issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In New Methuselahs John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With New Methuselahs he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis

**The Gift of Sublimation** Donald Capps,Nathan Carlin,2015-09-24 Today diversity of gender and sexuality is beginning to be recognized and celebrated even while many religious denominations still resist these cultural changes The Gift of Sublimation offers pastoral interpretations of these social shifts in the light of psychological principles and argues that there is historically not only one view of masculinity but multiple conceptions This discussion covers topics as diverse as the moral disapproval of masturbation the efforts of some churches to convince homosexual men to adopt a heterosexual orientation the dynamics of male envy of female longevity the homosexual tendencies of King James I of England and VI of Scotland and biblical portraits of God's body gender and sexuality Nathan Carlin and Donald Capps make special use of the psychoanalytic concept of sublimation the redirection of sexual desires that are considered unacceptable or unworthy towards interests and aspirations that are considered acceptable and worthy While the use of psychoanalytic hermeneutics here is likely to raise various red flags for potential religious readers especially for those who have been informed that Sigmund Freud was hostile towards religion this book presents a rather different view focussing on religious sublimation

**Discourses and Narrations in the Biosciences** Brian Hurwitz,Paola Spinozzi,2011 Discourses and Narrations in the Biosciences investigates the forms of writing in which scientific claims are formulated and announced Argumentative strategies

compositional rules and figurative expressions in communication and narrativization of scientific knowledge are the focus of interdisciplinary contributions by humanities and science scholars The first part of the book dedicated to Rhetorical and Epistemological Aspects of Science Writing addresses how scientific pursuits and methods feed into multi level texts that generate responses within science society and culture The second part entitled Bioscientific Discourses and Narrations examines popularisations and fictionalizations of science in relation to diversity deviancy ageing illness reproduction the evolution of humankind mathematical models of biomedical systems and the myth of the heroic scientist Assessing the narrative impetus and command of literary and meta discursive strategies shown by contemporary science writers enhances understanding of the methods and conventions through which the biosciences produce knowledge

**The Bible Doctrine of Man** C. Ryder Smith,2009-05-26 Upon the answers which thinkers give to the question What is Man depend on the answers they give to every other question hence the importance of this matter in the world s life and future Much that is current in theological discussion centers in the same inquiry It is evident that the Christian must know what the Bible says and Dr Ryder Smith is supremely qualified to expound the Bible teaching The author finds that the Doctrine of Man is implied rather than stated in Holy Writ he has made it his task to draw out the doctrine largely by examining the meaning of the Hebrew and Greek terms He has included a treatment of the Septuagint because the New Testament usually starts with the Septuagintal use There is special treatment of the important phrase The Image of God so frequently encountered in current theological discussion this is the more advantageous because Dr Ryder Smith maintains the usage has changed since the days of the Bible writers There are chapters on What ought a man to be as well as on What is a man and to the writer the former question is the more important This book which seeks to put in its right perspective the whole question of the Biblical doctrine of Man will take its place as the classical and fundamental treatment of this doctrine
