European Art of the Fifteenth Century Stefano Zuffi, 2005 Influenced by a revival of interest in Greco Roman ideals and sponsored by a newly prosperous merchant

class fifteenth century artists produced works of astonishingly innovative content and technique The International Gothic style of painting still popular at the beginning of the century was giving way to the influence of Early Netherlandish Flemish masters such as Jan van Eyck who emphasized narrative and the complex use of light for symbolic meaning Patrons favored paintings in oil and on wooden panels for works ranging from large hinged altarpieces to small increasingly lifelike portraits In the Italian city states of Florence Venice and Mantua artists and architects alike perfected existing techniques and developed new ones The painter Masaccio mastered linear perspective the sculptor Donatello produced anatomically correct but idealized figures such as his bronze nude of David and the brilliant architect and engineer Brunelleschi integrated Gothic and Renaissance elements to build the self supporting dome of the Florence Cathedral This beautifully illustrated guide analyzes the most important people places and concepts of this early Renaissance period whose explosion of creativity was to spread throughout Europe in the sixteenth century

The 100 Most Influential Painters & Sculptors of the Renaissance Kathleen Kuiper Manager, Arts and Culture, 2009-12-20 Presents the lives of the painters and sculptors of the Renaissance beginning with the Italian artists of the early period to the later artists in western and northern Europe
