My Music Is My Flag:

My Music Is My Flag Ruth Glasser, 1995-05-02 Puerto Rican music in New York is given center stage in Ruth Glasser's original and lucid study Exploring the relationship between the social history and forms of cultural expression of Puerto Ricans she focuses on the years between the two world wars Her material integrates the experiences of the mostly working class Puerto Rican musicians who struggled to make a living during this period with those of their compatriots and the other ethnic groups with whom they shared the cultural landscape Through recorded songs and live performances Puerto Rican musicians were important representatives for the national consciousness of their compatriots on both sides of the ocean Yet they also played with African American and white jazz bands Filipino or Italian American orchestras and with other Latinos Glasser provides an understanding of the way musical subcultures could exist side by side or even as a part of the mainstream and she demonstrates the complexities of cultural nationalism and cultural authenticity within the very practical realm of commercial music Illuminating a neglected epoch of Puerto Rican life in America Glasser shows how ethnic groups settling in the United States had choices that extended beyond either maintenance of their homeland traditions or assimilation into the dominant culture Her knowledge of musical styles and performance enriches her analysis and a discography offers a helpful addition to the text

My music is my flag Ruth Glasser, 1995 **Footsteps in the Dark** George Lipsitz, 2007 Most pop songs are short lived They appear suddenly and if they catch on seem to be everywhere at once before disappearing again into obscurity Yet some songs resonate more deeply often in ways that reflect broader historical and cultural changes In *Footsteps in the Dark* George Lipsitz illuminates these secret meanings offering imaginative interpretations of a wide range of popular music genres from jazz to salsa to rock Sweeping changes that only remotely register in official narratives Lipsitz argues can appear in vivid relief within popular music especially when these changes occur outside mainstream white culture Using a wealth of revealing examples he discusses such topics as the emergence of an African American techno music subculture in Detroit as a contradictory case of digital capitalism and the prominence of banda merengue and salsa music in the 1990s as an expression of changing Mexican Dominican and Puerto Rican nationalisms Approaching race and popular music from another direction he analyzes the Ken Burns PBS series *Jazz* as a largely uncritical celebration of American nationalism that obscures the civil rights era's challenge to racial inequality and he takes on the infamous campaigns to censor hip hop and the radical black voice in the early 1990s Teeming with astute observations and brilliant insights about race and racism deindustrialization and urban renewal and their connections to music *Footsteps in the Dark* puts forth an alternate history of post cold war America and shows why in an era given to easy answers and clichéd versions of history pop songs matter more than ever George Lipsitz is professor of black studies and sociology at the University of California Santa Barbara Among his many books are *Life in the Struggle* *Dangerous Crossroads* and *American Studies in a Moment of Danger* Minnesota 2001 **Worship and Song** Benjamin Severance

Musing Light, *Music Genres and Corporate Cultures* Keith Negus, 2013-07-04. *Music Genres and Corporate Cultures* explores the seemingly haphazard workings of the music industry tracing the uneasy relationship between economics and culture entertainment corporations and the artists they sign. Keith Negus examines the contrasting strategies of major labels like Sony and Polygram in managing different genres artists and staff. How do takeovers affect the treatment of artists? Why has Polygram been perceived as too European to attract US artists? And how did Warner's wooden floors help them sign Green Day? Through in depth case studies of three major genres rap country and salsa Negus explores the way in which the music industry recognises and rewards certain sounds and how this influences both the creativity of musicians and their audiences. He examines the tension between rap's public image as the spontaneous music of the streets and the practicalities of the market and asks why country labels and radio stations promote top selling acts like Garth Brooks over hard to classify artists like Mary Chapin Carpenter and how the lack of soundscan systems in Puerto Rican record shops affects salsa music's position on the US Billboard chart. Drawing on over seventy interviews with music industry personnel in Britain and the United States *Music Genres and Corporate Cultures* shows how the creation circulation and consumption of popular music is shaped by record companies and corporate business styles while stressing that music production takes within a broader culture not totally within the control of large corporations.
