In the Company of Men Nancy Mace, Mary Jane Ross, 2002-09 When Nancy Mace entered the Citadel the United States government had just recently overturned the ruling that women were not allowed to enter the Corps of Cadets Having grown up in a military family Nancy was not unfamiliar with the harsh realities of military life But upon entering those imposing gates Nancy soon found out that she wasn't just fighting the tradition of the corps but the culture and city that surrounded it Steeped in tradition and lore the grand bastion known as El Cid is considered one of the South's most infamous and controversial institutions Built in 1842 it has turned out a unique brand of Southern man and now woman This is the true account of one young woman's battle to be a part of the long gray line

Porphyry Introduction Porphyry, 2006 The Introduction to philosophy written by Porphyry at the end of the second century AD is the most successful work of its kind ever to have been published It was translated into most respectable languages and for a millennium and a half every student of philosophy read it as his first text in the subject Porphyry's aim was modest he intended to explain the meaning of five terms genus species difference property and accident terms which he took to be important to Aristotelian logic and metaphysics and hence to philosophy in general Thus in principle the Introduction is simple and elementary In fact there are sometimes difficulties and doubts on the surface of the text and beneath the surface there are frequent depths or profundities

The work raises directly or indirectly a number of perennial philosophical questions. In addition, the Introduction became in Boethius's Latin translation the point of reference for one of the longest lasting of philosophical disputes: the dispute over the status of universals. This book contains a new English translation of the Introduction preceded by a study of the life and works of Porphyry, the purpose and nature of the Introduction and the history of the text. It is accompanied by a discursive commentary, the primary aim of which is to analyse and assess the philosophical theses and arguments which the Introduction puts forward. But there are also numerous notes of a more philological or historical turn. The twentieth century turned away from Aristotelian logic and the Introduction lost its position on the syllabus. Barnes does not argue that it should be put back in its old place, but his commentary, the first to be published in English and the fullest to be published for a century, suggests that there is blood in the old man yet.

CLARENDON LATER ANCIENT PHILOSOPHERS
General Editors
Jonathan Barnes and A. A. Long

This series, which is modelled on the familiar Clarendon Aristotle and Clarendon Plato series, is designed to encourage philosophers and students of philosophy to explore the fertile terrain of later ancient philosophy. The texts range in date from the first century BC to the fifth century AD and will cover all the parts and all the schools of philosophy. Each volume contains a substantial introduction, an English translation, and a critical commentary on the philosophical claims and arguments of the text. The translations aim primarily at accuracy and fidelity, but they are also readable and accompanied by notes on textual problems that affect the philosophical interpretation. No knowledge of Greek or Latin is assumed.

Communicated Stereotypes at Work
Yifeng Hu, Anastacia Kurylo, 2024-05-15

In *Communicated Stereotypes at Work*, the editors and contributors posit that stereotypes communicated in the workplace remain a pervasive issue due to the dichotomy between the discriminatory and functional roles that these stereotypes can play in a range of professional settings. Contributors demonstrate that while the use of stereotypes in the workplace is distasteful and exclusionary, communicating these stereotypes can also appear on the surface to provide a pathway toward bonding with others, giving advice, and reducing uncertainty. The result of this dichotomy is that those who communicate stereotypes in the workplace may not view this communication from themselves or others as being problematic. With an emphasis on qualitative methods and analyses, contributors deconstruct stereotypes by exploring the theoretical, empirical, and pragmatic roles they play in communication. In doing so, authors expose the underpinnings of stereotypes and why they are communicated, focus on the role all of us play in perpetuating stereotypes, and suggest alternative modes of productive discourse. Scholars of interpersonal and organizational communication, cultural studies, and sociology, as well as practitioners of various professions, will find this book particularly useful.
