Imperialism, Race and Resistance Barbara Bush, 2002-01-04 Imperialism Race and Resistance marks an important new development in the study of British and imperial interwar history Focusing on Britain West Africa and South Africa Imperialism Race and Resistance charts the growth of anti colonial resistance and opposition to racism in the prelude to the post colonial era The complex nature of imperial power is explored as well as its impact on the lives and struggles of black men and women in Africa and the African diaspora Barbara Bush argues that tensions between white dreams of power and black dreams of freedom were seminal in transforming Britain's relationship with Africa in an era bounded by global war and shaped by ideological conflict

The Columbia Guide to South African Literature in English Since 1945 Gareth Cornwell, Dirk Klopper, Craig MacKenzie, 2010 From the outset South Africa's history has been marked by division and conflict along racial and ethnic lines From 1948 until 1994 this division was formalized in the National Party's policy of apartheid Because apartheid intruded on every aspect of private and public life South African literature was preoccupied with the politics of race and social engineering Since the release from prison of Nelson Mandela in 1990 South Africa has been a new nation in the making inspired by a nonracial idealism yet beset by poverty and violence South African writers have responded in various ways to Njabulo Ndebele's call to rediscover the ordinary The result has been a kaleidoscope of texts in which evolving cultural forms and modes of identity are rearticulated and explored An invaluable guide for general readers as well as scholars of African literary history this comprehensive text celebrates the multiple traditions and exciting future of the South African voice Although the South African Constitution of 1994 recognizes no fewer than eleven official languages English has remained the country's literary lingua franca This book offers a narrative overview of South African literary production in English from 1945 to the postapartheid present An introduction identifies the most interesting and noteworthy writing from the period Alphabetical entries provide accurate and objective information on genres and writers An appendix lists essential authors published before 1945

British Murder Mysteries, 1880-1965 Laura E. Nym Mayhall, Elizabeth Prevost, 2022-08-09 British Murder Mysteries 1880 1965 Facts and Fictions conceptualizes detective fiction as an archive i.e. a trove of documents and sources to be used for historical interpretation By framing the genre as a shifting set of values definitions and practices the book historicizes the contested meanings of analytical categories like class race gender nation and empire that have been applied to the forms and functions of detection Three organizing themes structure this investigation fictive facticity genre fluidity and conservative modernity This volume thus

shows how British detective fiction from the late nineteenth to the mid twentieth century both shaped and was shaped by its social cultural and political contexts and the lived experience of its authors and readers at critical moments in time

Racism and Colonialism R.J. Ross, 2012-12-06 1 REFLECTIONS ON A THEME by ROBERT ROSS This book the fourth in the series Comparative Studies in Overseas History and like its predecessors the product of a symposium held by the Leiden Centre for the History of European Expansion is organised around a single theme the relationship between the ideological structures of domination and oppression that have come to be called racism and the political and economic ones which grew out of Europe's conquering and ruling much of the rest of the world By racism we mean those systems of thought in which group characteristics of human beings of a non somatic nature are considered to be fixed by principles of descent and in which in general physical attributes other than those of sex are the main sign by which characteristics are attributed In addition almost by definition the systems of thought entailed in this require that there is a hierarchy of the various races and that those people in the lower ranks of that hierarchy are seriously disadvantaged at least if the proponents of racist thought are able to impose their will on the society in which they live The exclusion of the discrimination of women from the concept of racism should not be thought as entailing that racist and sexist ideas do not have much in common since both derive from essentially biological determinism and indeed 2 racist societies have historically almost invariably been strongly sexist

BULLSHIT Jonathan Ancer, 2024-03-04 An outrageous miscellany of serious and light hearted lies myths untruths fibs and fabrications that tells the tall tale of South Africa The fibs come thick and fast like a burst sewerage pipe Why everything we've learnt about Shaka Zulu Africa's Napoleon is a pack of lies Back in the darkest of ages the 1970s citizens were told that there were satanic messages if you played some of The Beatles songs backwards National icon Hansie Cronje was a paragon of virtue and integrity until he wasn't President Nelson Mandela told us that we as a nation were special Turns out we aren't Whether a fabulous fib an artful con a doctor's spin or simply a bald faced lie there's something for everyone

The Changing Face of Higher Education Dennis Ahlburg, 2018-07-04 Over the last decade a heated debate has raged in the US and the UK over whether the humanities are in crisis and if there is one what form this crisis takes and what the response should be Questioning how there can be such disagreement over a fundamental point The Changing Face of Higher Education explores this debate asking whether the humanities are in crisis after all by objectively evaluating the evidence at hand and opening the debate up to a global scale by applying the questions to twelve countries from different continents Each carefully chosen contributor considers the debate from the perspective of a different country The chapters present data on funding student enrolment in the humanities whether the share of total enrolment in this area is falling and answer the following questions What does each country mean by the humanities Is there a crisis in the humanities in this country What are the causes for the crisis What are the implications for the humanities disciplines Uniquely offering an objective evaluation of whether this crisis exists the book will appeal to international humanities and higher education

The Oxford History of the British Empire: Volume V: Historiography Robin Winks, 1999-10-21 The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth British imperialism was a catalyst for far reaching change The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning the meaning of British imperialism for the ruled as well as for the rulers and the significance of the British Empire as a theme in world history This fifth and final volume shows how opinions have changed dramatically over the generations about the nature role and value of imperialism generally and the British Empire more specifically The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire the pressure of current events access to primary sources the creation of relevant university chairs the rise of nationalism in former colonies decolonization and the Cold War They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide ranging enquiry about international relations the uses of power and impacts and counterimpacts between settler groups and native peoples The result is a thought provoking cultural and intellectual inquiry into how we understand the past and whether this understanding might affect the way we behave in the future

Men at Work Cecile Jackson, 2013-10-23 Gender analysis of development focuses on gender relations rather than women and men as separate gender categories but it has necessarily been women orientated in its concerns with subordination This work moves gender analysis towards a fuller understanding of men s diverse gendered identities and how these are implicated in their everyday working lives in developing country contexts The questions addressed in the papers range from conceptual and methodological issues of definitions and measurement of men s work to case studies of working men in specific settings but all are concerned with the recognition of gendered vulnerabilities of some men as men as well as with a re thinking of gender relations in the light of consideration of the subjectivities of specific groups of men
