The Dola Project Cecil Thomas, 2022-12-22 A wealthy woman named Dola decided to address some larger problems faced by the US She knew she could not work alone on such big issues so she recruited a group of seven young people in their late twenties The group became known as Team Dola She explained

that the group of seven would not do all the work on a selected project. Instead the group would recruit experts who could do most of the work. In other words Team Dola would initiate a project that others would implement. Their first of four projects involved desalinating Pacific Ocean water and pumping the fresh water into rivers to supplement irrigation. The second project addressed the problem of wildfires by replacing traditional controlled burning with mulching. A third project arose from their concern for missing persons. The fourth project addressed the problem of sinking cities with focus on New Orleans. The young members of Team Dola approach their tasks using unconventional and offbeat methods with surprising successes. They engage allies from multiple government agencies: members of the Navajo Nation, California farmers, and even Louisiana politicians. They also manage to have fun and experience romances and disappointments all while growing into a close knit formidable team that successfully addresses our nation's pressing problems. Earth Grid Down Stuart P.

Coates, 2017-03-27 Peter Bradshaw hates technology. He knows he's a throwback to a simpler time and yet he also knows he needs the technology he hates to follow his passion. He's spent the last two decades studying ancient artifacts specifically Stonehenge, the statues of Easter Island, and the Seven Wonders of the World, but most importantly the Great Pyramid in Egypt. He's just made an amazing discovery. He found a crystal with the capability of moving objects of great weight which might explain how the pyramids were built. He's headed back to America to share his findings but once there he realizes an eleven foot tall woman with ill intent is following him. Then the entire world's power grid suddenly fails. An unstoppable force of nature has wiped out all advanced technology in the blink of an eye. The world has simultaneously crashed. Is it possible that whatever Peter discovered in Egypt could reboot civilization? He needs the help of the mysterious woman who's on his tail, but is she willing to help or will the Earth become a place of darkness and death?
