Person, Being, and History Michael Baur, Robert E. Wood, 2011-03 During a distinguished career as thinker and educator at universities across North America philosopher Kenneth L Schmitz has striven to recover metaphysical realism in a world that has after Kant turned to the subject Schmitz has done so through precisely the window of the subjectivity particularity and concern for history which marks philosophy after Kant Although primarily associated with his native University of Toronto where he was known as the Educator Schmitz also taught at Loyola Marymount Marquette the Catholic University of America and the John Paul II Institute for Studies on Marriage and Family His teaching focused upon the singularity of the human person founded upon the notion of being that generates the history of philosophy He was eminently generous in his appreciation of the philosophers about whom he lectured He taught philosophy richly grounded in the history of philosophy as a gold mine rather than as a minefield Anchored in his spirit the various essays in this volume by colleagues and former students of Schmitz examine his thought and the subjects of his teaching In addition to an overall exposition of his own thought the collection treats themes such as gift faith and reason culture and dialogue modernity and post modernity and themes in the work of various thinkers including Aristotle Anselm Aquinas Martin Heidegger Gabriel Marcel Max Scheler and Jean Paul Sartre Special attention is given to G W F Hegel whose philosophy Schmitz was particularly adept at teaching He turned many a budding scholar into a life long student of Hegel s work Several of the essays begin with a special tribute to the honoree The volume concludes with a bibliography of Schmitz s many works Michael Baur is associate professor of philosophy and adjunct professor of law at Fordham University He is the editor of numerous works including *The Emergence of German Idealism* Robert E Wood is professor and former chair of philosophy at the University of Dallas He is the longtime editor of the *American Catholic Philosophical Quarterly* and author of three books and numerous articles Contributors Thomas Anderson Jennifer Bates Michael Baur John Burbidge Thomas Busch James Crooks Daniel O Dahlstrom John Deely Martin Donougho Jude P Dougherty Louis Dupr James Kow Jay Lampert John C McCarthy Ralph McInerny John Russon Daniel E Shannon and Robert E Wood PRAISE FOR THE BOOK The editors of this book have done a great service in drawing attention to the notable excellences of Schmitz s work excellences both systematic and historical Perhaps this will provide some impetus to make available more of his essays surely worthy to be communicated to as wide an audience as possible The Thomist In his work Kenneth Schmitz seeks to unify the disparate and argumentatively to seek the common ground on a diverse gathering of opinions Not that he is blind to difference or so tolerant that criticism is suspended Rather his principal convictions enable him to favor the principle of charity in interpretation and respect in critical assessment That these

qualities have been communicated to his former students and colleagues is apparent in these essays This collection brings the facets of Schmitz's philosophical thought into a fruitful exchange and introduces the lifework of an incredibly gifted and original thinker Thomas R Flynn Samuel Candler Dobbs Professor of Philosophy Emory University *One Hundred Years of Pressure* Alan F. Chalmers, 2017-04-20 This monograph investigates the development of hydrostatics as a science In the process it sheds new light on the nature of science and its origins in the Scientific Revolution Readers will come to see that the history of hydrostatics reveals subtle ways in which the science of the seventeenth century differed from previous periods The key the author argues is the new insights into the concept of pressure that emerged during the Scientific Revolution This came about due to contributions from such figures as Simon Stevin Pascal Boyle and Newton The author compares their work with Galileo and Descartes neither of whom grasped the need for a new conception of pressure As a result their contributions to hydrostatics were unproductive The story ends with Newton insofar as his version of hydrostatics set the subject on its modern course He articulated a technical notion of pressure that was up to the task Newton compared the mathematical way in hydrostatics and the experimental way and sided with the former The subtleties that lie behind Newton's position throws light on the way in which developments in seventeenth century science simultaneously involved mathematization and experimentation This book serves as an example of the degree of conceptual change that new sciences often require It will be of interest to those involved in the study of history and philosophy of science It will also appeal to physicists as well as interested general readers Ethics and Theological Disclosures Guy Mansini, James G. Hart, 2003 Honouring distinguished philosopher and professor Robert Sokolowski for his work in phenomenology the essays included in this collection demonstrate the reception and fruitfulness of Sokolowski's analysis of moral action and his idea of a theology of disclosure **Marking the Mark of the Mental** Alberto Voltolini, 2025-10-26 This book explores new perspectives on venerable problems about being mental that have always attracted philosophers' attention For human beings being mental is one of the most fascinating research subjects since having a mind is the feature that makes our life unique Yet what does mentality really consist in Is there a realm of the mental that can be singled out from other domains and in what relation does being mental stand with other basic features of the world notably being physical or having a body By linking mentality with intentionality phenomenal consciousness and other interesting features this book provides a fresh perspective on philosophy of mind **China's Philosophical Studies: Rediscovery Of Chinese Spiritual Essence** Ruiquan Gao, Guan Jun Wu, 2022-02-25 China's Philosophical Studies Rediscovery of Chinese Spiritual Essence collects essential research findings of China's philosophical studies conducted by the academics at East China Normal University ECNU in recent years The book covers topics including thoughts in China's Spring and Autumn Period Chinese virtue of trust establishing morals historical studies of Chinese philosophy etc This book is the fifth volume of the WSPC ECNU Series on China This Series showcases the significant contributions to scholarship in social sciences and humanities studies about China It is jointly launched by World

Scientific Publishing the most reputable English academic publisher in Asia and ECNU a top University in China with a long history of exchanges with the international academic community *Synopsis: An Annual Index of Greek Studies, 1993, 3*

Berchman, 2021-04-23 Aristotle and Plotinus set the horizon of inquiry thinking is thinking on thinking Discussion of mind meaning and subjectivity begins with the question How is thinking on thinking different from the kind of thinking with which we are familiar The answer is that thinking on thinking is about the presuppositions concepts and problems that generate questions in ancient and modern metaphysics epistemology aesthetics philosophy of mind and philosophy of language Topics examined include the nature of intentionality and meaning identity and relation mind and consciousness self identity and subjectivity which lead into discussions concerning other minds the limits of thought and language and the emergence of aesthetics of the self The effects of thinking on thinking are mapped particularly in parsing problems in ancient modern analytic and phenomenological thought with advocacy of its importance in the present age A Companion to Wittgenstein on Education Michael A. Peters, Jeff Stickney, 2017-05-03 This book bringing together contributions by forty five authors from fourteen countries represents mostly new material from both emerging and seasoned scholars in the field of philosophy of education Topics range widely both within and across the four parts of the book Wittgenstein s biography and style as an educator and philosopher illustrating the pedagogical dimensions of his early and late philosophy Wittgenstein s thought and methods in relation to other philosophers such as Cavell Dewey Foucault Hegel and the Buddha contrasting investigations of training in relation to initiation into forms of life emotions mathematics and the arts dance poetry film and drama including questions from theory of mind nativism vs initiation into social practices neuroscience primate studies constructivism and relativity and the role of Wittgenstein s philosophy in religious studies and moral philosophy as well as their profound impact on his own life This collection explores Wittgenstein not so much as a philosopher who provides a method for teaching or analyzing educational concepts but rather as one who approaches philosophical questions from a pedagogical point of view Wittgenstein s philosophy is essentially pedagogical he provides pictures drawings analogies similes jokes equations dialogues with himself questions and wrong answers experiments and so on as a means of shifting our thinking or of helping us escape the pictures that hold us captive
