Improving the Characterization and Treatment of Radioactive Wastes for the Department of Energy's Accelerated Site Cleanup Program National Research Council, Division on Earth and Life Studies, Board on Radioactive Waste Management, Committee on Opportunities for Accelerating Characterization and Treatment of Waste at DOE Nuclear Weapons Sites, 2005-01-06 The Department of Energy's Office of Environmental Management EM directs the massive cleanup of more than 100 sites that were involved in the production of nuclear weapons materials during the Manhattan Project and the Cold War This report offers suggestions for more effectively characterizing and treating the orphan and special case wastes that are part of EM's accelerated cleanup program It identifies technical opportunities for EM to improve the program that will save time and money without compromising health and safety The opportunities identified include making more effective use of existing facilities and capabilities for waste characterization treatment or disposal eliminating self imposed requirements that have no clear technical or safety basis and investing in new technologies to improve existing treatment and characterization capabilities For example the report suggests that EM work with DOE classification officers to declassify to the extent possible classified materials declared as wastes The report also suggests a new approach for treating the wastes that EM will leave in place after cleanup

Geological and Geotechnical Engineering in the New Millennium National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Geological and Geotechnical Engineering, Committee on Geological and Geotechnical Engineering in the New Millennium: Opportunities for Research and Technological Innovation, 2006-01-31 The field of geoengineering is at a crossroads where the path to high tech solutions meets the path to expanding applications of geotechnology In this report the term geoengineering includes all types of engineering that deal with Earth materials such as geotechnical engineering geological engineering hydrological engineering and Earth related parts of petroleum engineering and mining engineering The rapid expansion of

nanotechnology biotechnology and information technology begs the question of how these new approaches might come to play in developing better solutions for geotechnological problems This report presents a vision for the future of geotechnology aimed at National Science Foundation NSF program managers the geological and geotechnical engineering community as a whole and other interested parties including Congress federal and state agencies industry academia and other stakeholders in geoengineering research Some of the ideas may be close to reality whereas others may turn out to be elusive but they all present possibilities to strive for and potential goals for the future Geoengineers are poised to expand their roles and lead in finding solutions for modern Earth systems problems such as global change emissions free energy supply global water supply and urban systems

Handbook of Systems Engineering and Analysis of Electro-Optical and Infrared Systems William Wolfgang Arrasmith, 2025-06-30 There has been a lot of innovation in systems engineering and some fundamental advances in the fields of optics imaging lasers and photonics that warrant attention This volume focuses on concepts principles and methods of systems engineering related topics from government industrial and academic settings such as development and operations DevOps agile methods and the concept of the digital twin Handbook of Systems Engineering and Analysis of Electro Optical and Infrared Systems Concepts Principles and Methods offers more information on decision and risk analysis and statistical methods in systems engineering such as design of experiments DOX methods hypothesis testing analysis of variance blocking 2k factorial analysis and regression analysis It includes new material on systems architecture to properly guide the evolving system design and bridge the gap between the requirements generation and design efforts The integration of recent high speed atmospheric turbulence research results in the optical technical examples and case studies to illustrate the new developments is also included A presentation of new optical technical materials on adaptive optics AO atmospheric turbulence compensation ATC and laser systems along with more are also key updates that are emphasized in the second edition 2 volume set Because this volume blends modern day systems engineering methods with detailed optical systems analysis and applies these methodologies to EO IR systems this new edition is an excellent text for professionals in STEM disciplines who work with optical or infrared systems It s also a great practical reference text for practicing engineers and a solid educational text for graduate level systems engineering engineering science and technology students This book is also available as a set Handbook of Systems Engineering and Analysis of Electro Optical and Infrared Systems 978 1 032 22242 4

The Politics of Radioactive Waste Management Gianluca Ferraro, 2018-11-01 Environmental concerns have pushed the decarbonisation of the European economy high on the EU political agenda This has renewed old debates about the role of nuclear energy in the European economy and society that gravitate around the issues of nuclear safety and radioactive waste management RWM RWM carries many elements of technical complexity scientific uncertainty and social value which makes policy decisions highly controversial Public participation is usually believed to improve these decisions ease their implementation by solving substantial conflicts and

enhance trust and social acceptance Drawing upon sources including Euratom and the OECD Nuclear Energy Agency the author offers a detailed overview of public involvement in RWM in the EU analysing the implementation of national policies through official programmes and the views of stakeholders from all Member States This book highlights the key successes and challenges in the quest for greater participation in RWM and extrapolates insights for other contested energy infrastructures and controversies in land use This book will be of great relevance to students scholars and practitioners with an interest in radioactive waste management energy policy and EU environmental politics and policy
