Beholding Ken Wilder, 2020-05-14 Beholding considers the spatially situated encounter between artwork and spectator It argues that artworks created for specific places or conditions structure a reciprocal encounter which is completed by the presence of a beholder These are works which demand the beholder's share but not as Ernst Gombrich famously claimed to sustain an illusion Rather Beholding reconfigures Gombrich's notion of the beholder's share as a set of licensed imaginative and cognitive projections Each chapter frames a particular work of art from the remit of a complementary theoretical text The book establishes a transhistorical notion of the spatially situated encounter and considers the role of the architectural host in bringing the beholder's orientation into play The book engages a diverse range of practices from Renaissance painting and group portraiture to intermedia practices of installation and performance art Written within the broad remit of reception aesthetics the book proposes a phenomenological theory of beholding argued through an in depth examination of artworks and their spatial contexts selected for their explanatory potential These various encounters allocate different constitutive roles to the beholder bringing not only spatial and temporal orientation into play but also a repertoire of anticipated ideas and beliefs

John Guare's

Theatre Robert J. Andreach, 2009-01-14 From the 1960s to the present day John Guare's plays have ranged from one act to cyclic realistic to surrealistic naturalistic to experimental and tragic to comic dramas This study's approach to the cornucopia the playwright himself provided when in an interview he gave a fundamental aesthetic principle of his craft Like a person and Guare's plays develop the personal as well as the artistic self a play must be grounded in reality only then can it soar The ground is traditional theatre with characters no matter how larger than life they can be and plot no matter how illogical it can be The soaring is in interrupting the action with monological narratives and musical interludes bringing characters back from the dead and having the action take hairpin turns into a mixture of genres and styles modes and tones In verbal and visual images the flight invokes works by authors as varied as Aeschylus and Whitman Dante and Feydeau Verdi and Romberg Soaring from ground to new ground the theatre creates the transmission of the American heritage in Lake Hollywood an idealism corrupted by a fraudulent American Dream in *Lydie Breeze* and the recovery of the past in *A Few Stout Individuals* As Guare said about his plays they interconnect

[25 Great Sentences and How They Got That Way](#) Geraldine Woods, 2020-08-18 A guide to the artistry that lifts a sentence from good to great We all know the basic structure of a sentence a subject verb pair expressing a complete thought and ending with proper punctuation But that classroom definition doesn't begin to describe the ways in which these elements can combine to resonate with us as we read to make us stop and think laugh or cry In *25 Great Sentences and How They Got That Way* master teacher Geraldine Woods unpacks powerful examples of what she

instead prefers to define as the smallest element differentiating one writer's style from another's a literary universe in a grain of sand. And that universe is very large: the hundreds of memorable sentences gathered here come from sources as wide ranging as Edith Wharton and Yogi Berra, Toni Morrison and Yoda, T. S. Eliot and Groucho Marx. Culled from fiction, nonfiction, drama, poetry, song lyrics, speeches, and even ads, these exemplary sentences are celebrated for the distinctive features—whether of structure, diction, connection, comparison, sound, or extremes—that underlie their beauty, resonance, and creativity. With dry humor and an infectious enjoyment that makes her own sentences a pleasure to read, Woods shows us the craft that goes into the construction of a memorable sentence. Each chapter finishes with an enticing array of exercises for those who want to test their skill at a particular one of the featured twenty-five techniques, such as onomatopoeia in the Sound section or parallelism in the Structure section. This is a book that will be treasured by word nerds and language enthusiasts, writers who want to hone their craft, literature lovers, and readers of everything from song lyrics and speeches to novels and poetry.
