Rescue of Business in Europe Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30. This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016. The project sought to investigate and articulate the essential features of well-functioning procedures for the rescue of distressed but viable businesses. Although the focus was primarily on the design and implementation of formal procedures that is those provided by law, the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter. The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business; an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative. The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures.

Legal and Ethical Standards in Corporate Insolvency Elizabeth Streten, 2024-06-17. Recent financial crisis and the global financial impacts of the COVID 19 pandemic have brought renewed interest to the regulation and practice of corporate insolvency and restructuring. Modernisation of the insolvency profession and the regulation of its practitioners is a contemporary concern and recent years have seen significant reforms of insolvency law. The success of such reforms can be enhanced through a clear understanding of difficulties faced by the insolvency profession in achieving successful restructuring and insolvency outcomes and through the determination of effective solutions to those difficulties. However, there is limited empirical data to inform the day to day practice of insolvency nor the difficulties experienced by insolvency practitioners in pursuing insolvency and restructuring solutions. This book addresses this absence of data and understanding examining the role and practice of corporate insolvency practitioners and exploring the challenges that they encounter. Offering an empirical study together with a comparative analysis of the experiences of practitioners around the world, this book facilitates a greater understanding of corporate insolvency practice confronting a misunderstanding of and under confidence in corporate insolvency practitioners, making it key reading for academics, practitioners and regulators working in the area of corporate insolvency.
