Personality and Psychological Disorders Gordon Claridge, Caroline Davis, 2003 In recent years, the assumption that there is a significant connection between normal psychological and biological differences and the development of psychological disorders has grown, and research in this area has developed rapidly. This textbook, written by internationally known psychologists with expertise in both the areas of abnormal and differential psychology, aims to integrate evidence and ideas from healthy personality and temperament on the one hand and psychological disorders on the other. This is achieved by viewing personality traits as predispositions to disorder and by questioning how far the causes of various disorders can be seen as an extension or exaggeration of processes underlying normal personality or temperament. These main themes are discussed using a biological perspective, i.e., based on the theory that personality can be deconstructed into a number of basic dimensions of biological origin that also act as vulnerability factors for disorder. This is a second-level textbook for

undergraduate students of psychology but will also be recommended for health professionals and their trainees psychiatrists clinical psychologists and nurses

Cognitive Psychotherapy Toward a New

Millennium Tullio Scrimali, Liria Grimaldi, 2012-02-02 In the roughly two decades since Aaron T Beck published the now classic Cognitive Therapy of Depression and Michael J Mahoney declared the Cognitive Revolution much has happened What was proposed as the cognitive revolution has now become the zeitgeist and Cognitive Therapy CT has grown exponentially with each passing year A treatment model that was once seen as different strange or even alien is now commonplace In fact many people have allied themselves with CT claiming that they have always done CT Even my psychoanalytic colleagues have claimed that they often use CT After all they say Psychoanalysis is a cognitive therapy Cognitive Therapy or Cognitive Psychotherapy has become a kaleidoscope model of treatment with influences coming from many sources Some of these contributory streams have been information processing behavior therapy Constructivist psychology and dynamic psychotherapy Each of these sources have added color shading and depth to the CT model What was originally uni dimensional in terms of the CT focus on depression has become multidimensional as the CT model has been applied to virtually every patient population treatment setting and therapy context CT must now be seen as a general model of psychotherapy that with modifications can be applied to the broad range of clinical problems and syndromes What has tied these various applications of CT together is the emphasis on a strong grounding in cognitive theory a commitment to

empirical support and a dedication to broadening the model *Psychobiographies Of Political Leaders From Across The World* Claude-Hélène Mayer,Roelf van Niekerk,Moshe Banai,2025-03-03 The authors explore the life and leadership of extraordinary political leaders in different socio cultural contexts and epochs and present new insights in political psychobiography They investigate the lives personalities politics philosophies careers leadership and leadership styles of leaders from the UK Germany France South Africa China Turkey and Zimbabwe and lead discourses on the advancement of contemporary theories and methodologies A must read to understand leaders and leadership in historical contemporary cultural and intercultural perspectives **Political Leadership for the New Century** Linda O. Valenty,Ofer

Feldman,2002-03-30 Valenty Feldman and their contributors challenge the current state of political leadership studies by offering a variety of analytical methods from scholars around the world While focused on American political leadership the different approaches and vantage points offer fresh insights of the roles of cultural and political context including the historical circumstance environmental factors and socialization agents that affect and shape American political leadership and performance The highly unusual and valuable approach includes multidisciplinary perspectives with contributors from the fields of political science political psychology philosophy sociology and economics Scholars students and researchers from a variety of disciplines will find the evaluations of the interaction between personality leadership decision making and context invaluable **Personality and Neurosurgery** J. Brihaye,L. Calliauw,F. Loew,R. van den Bergh,2012-12-06 The human personality is inextricably bound up with among other things the function of the central nervous system Diseases and malfunctions of the brain head injuries and neurosurgical operations can all result in permanently altered behaviour patterns This interrelation between brain and behaviour is most clearly demonstrated in cases involving functional neurosurgery and severe traumatic lesions Despite the fact that this interrelation represents an everyday challenge to the neurosurgeon it is a question which receives less attention than it deserves in neurosurgical meetings Given the scope and complexity of this topic it is not possible to cover every aspect of it here hence discussion is limited to the impact on personality of injuries language epilepsy and psychosurgery However before considering the medical aspects it was deemed necessary to try and arrive at a definition of personality This question was discussed by a number of philosophers representing various perspectives Their diversity of viewpoints and conceptions greatly enriched the discussions
