Personality As An Affect Processing System Toward An Integrative Theory:

Personality as an Affect-processing System Jack Block, 2002 At least since Hippocrates human beings have been trying to describe and analyze the behavioral and cognitive consistencies now referred to as personality And in recent decades no less than in the preceding centuries they have generated a bewildering variety of construals and constructs In this landmark book Jack Block who has spent more than 50 years studying the many facets of personality takes a long look at current debates and finds common ground on which to construct an integrative model Perceiving more congruence among disparate formulations than has hitherto been appreciated he elaborates his vision of personality as an adaptive system that enables the individual to maintain equilibrium in an environment that is both threatening and engaging Taking in and organizing information and maintaining nondisruptive levels of anxiety while responding to outer and inner demands are the tasks of this system which consists of a perceptual apparatus and a control apparatus operating in delicate balance After presenting his model of personality Block discusses its intellectual history and its connections to major current alternatives He lays out some implications for practitioners confronted by dysfunction Finally he traces the developmental origins of personality Provocative innovative and analytical *Personality as an Affect Processing System Toward an Integrative Theory* points to new directions for all those who seek to understand human psychological functioning

The Myth of the Spoiled Child Alfie Kohn, 2014-03-25

Somehow a set of deeply conservative assumptions about children what they're like and how they should be raised have congealed into the conventional wisdom in our society Parents are accused of being both permissive and overprotective

unwilling to set limits and afraid to let their kids fail Young people meanwhile are routinely described as entitled and narcissistic among other unflattering adjectives In *The Myth of the Spoiled Child* Alfie Kohn systematically debunks these beliefs not only challenging erroneous factual claims but also exposing the troubling ideology that underlies them Complaints about pushover parents and coddled kids are hardly new he shows and there is no evidence that either phenomenon is especially widespread today let alone more common than in previous generations Moreover new research reveals that helicopter parenting is quite rare and surprisingly may do more good than harm when it does occur The major threat to healthy child development John argues is posed by parenting that is too controlling rather than too indulgent With the same lively contrarian style that marked his influential books about rewards competition and education Kohn relies on a vast collection of social science data as well as on logic and humor to challenge assertions that appear with numbing regularity in the popular press These include claims that young people suffer from inflated self esteem that they receive trophies praise and As too easily and that they would benefit from more self discipline and grit These conservative beliefs are often accepted without question even by people who are politically liberal Kohn s invitation to reexamine our assumptions is particularly timely then his book has the potential to change our culture s conversation about kids and the people who raise them

The Structure of Concern: A Challenge for Thinkers Neil LaChapelle,2008-12-08 This book has two goals It introduces a pattern of 4 interlocking constraints which I call the structure of concern and it issues a challenge to all of the thinkers of world to find the best level of description for it the level at which it might be explained concern structure models turn up everywhere including discussions of knowledge management methodologies suicide yoga information systems sex multi agent networking ethics nervous system organization drama military planning speech pragmatics forest conservation education and even philosophy Some concern structure models are quite specialized and obscure but some others count among the most widely used conceptual frameworks we have My main goal in this book is simply to compare all of these frameworks to point out the similarities between them This catalog itself is the argument I make in this book the argument that some universal pattern lurks among all these models a universal pattern that needs description
