Personality Disorders Recognition And Clinical Management:

Personality Disorders Jonathan H. Dowson, 1995-11-23 Personality disorders consist of long term patterns of maladaptive behaviour which have a generally unrecognised importance in clinical practice However personality disorders are the origins of many medical consultations and social ills including substance abuse alcoholism self harm suicide neglect of children criminality and HIV transmission In a comprehensive summary and evaluation of the clinical literature this book seeks to dispel the myth that personality disorder is simply a category for those problem individuals for whom nothing can be done With detailed coverage of recognition assessment and management Drs Dowson and Grounds provide a co ordinated empirically based account of those aspects of personality disorders which are of relevance to psychiatrists and allied disciplines including clinical psychologists social workers criminologists specialist nurses and primary care physicians

Personality Disorders: Recognition and Clinical Management Jonathan H. Dowson, Adrian T. Grounds, 1995

Personality Disorder and Serious Offending Christopher Newirth, Clive Meux, Pamela Taylor, 2006-03-31 People with personality disorder who offend tend to be neglected by health services in most countries In the UK there has been renewed interest in the field since government initiatives in the end of the 1990s Government proposals themselves are controversial but there is growing recognition that it is unsafe both for the general public and for the primary sufferer alike if the neglect continues Years of experience have combined to provide a highly practical reference work covering Models of understanding of personality development and disorder Methods of assessment and treatment and how they can be applied and modified Special issues drug misuse long stay induced secondary disorders issues pertinent to women only intractable patients A path for care from initial assessment to the logistics of discharge Management issues choosing staff supervision and support of staff Evidence based and entirely comprehensive in its approach practitioners will find Personality Disorder and Serious Offending both a practical and insightful adjunct that will assist them in their work Structured Clinical Management (SCM) for Personality Disorder Stuart Mitchell, Mark Sampson, Anthony Bateman, 2022 Structured clinical management SCM is a unified approach to the treatment of people with personality disorder which is within reach of general mental health professionals without extensive additional training This book provides a practical and detailed guide on how mental health services can implement SCM in their clinical practice **Personality Disorders and States of Aloneness** John G.

McGraw, 2012-01-01 This book is the second volume of an interdisciplinary study chiefly one of philosophy and psychology which concerns personality especially the abnormal in terms of states of aloneness primarily that of the negative emotional isolation customarily known as loneliness Other states of aloneness investigated include solitude reclusiveness seclusion desolation isolation and what the author terms aloneliness alonism lonism and lonerism Insofar as this study most explicitly focuses on abnormal personalities it employs the general and specific definitions of personality aberrations as formulated by the American Psychiatric Association in its latest edition of the Diagnostic and Statistical Manual of Mental Disorders DSM IV

The author views personality as preeminently comprised of the individual's interpersonal relationships. Unlike the DSM IV, he proposes that people with personality disorders not only possibly but necessarily manifest deviancy regarding interpersonal functioning via serious shortcomings in shared inwardness, paramourly reciprocated intimacy. This work also engages in an analysis of five social factors that are conducive to predisposing, precipitating and maintaining negative kinds of personality and aloneness. The author has formed these factors into an acronym titled SCRAM since when they are present, intimacy scurries away and in its absence, loneliness and other sorts of unwanted aloneness scamper in and fill the person with unhappiness via, for instance, sadness and self-worthlessness. The constituents of SCRAM are the following social illnesses: Successitis (for example, the fixation on fame and fortune), Capitalitis (greed-driven unfettered capitalism), Rivalitis (competitiveness), Atomitis (hyper-individualism) and Materialitis (for example, the anti-spirituality of consumeritis). In sum, this book provides a different perspective on personality via the lenses of various types of aloneness and their lack of public and private intimacy, especially love.
