Personality Of The Alcoholic Guises Of D:

Introduction to Alcoholism Counseling Jerome David Levin,1995 Beginning with the chemical and pharmacological aspects of alcoholism this book goes on to examine the medical social anthropological and psychological foundations of the problem This second edition features discussion on new treatment *The Biology of Alcoholism* Benjamin Kissin,2012-12-06 Pathogenesis is defined in Blakiston s Medical Dictional as the course of development of disease including the sequence of processes or events from inception to the characteristic lesion or disease The central position of the word pathogenesis in the titles of Volumes 6 and 7 in itself connotes a bias on the part of the editors in favor of the disease concept of alcoholism inasmuch as the end product of the pathogenetic process is presumed to be a disease But the disease model as here conceptualized is vastly different from that of Jellinek or of Alcoholics Anonymous or of psychoanalysis In those theories alcoholism is seen as the inevitable consequence of some specific flaw in the heredity or the experience of the afflicted individual that inexorably leads to alcoholism In these present volumes the alcoholic syndrome is viewed rather as the outgrowth of the interaction of a variety of biological psychological and social influences which depending on the predominance of one or another may lead to different types of alcoholism This view which has been labeled the bio psycho social perspective encompasses a larger view of the dynamics of the development of alcoholism incorporating data from each of the phenomenologic levels involved An additional complication arises from the fact that the physiological and psychosocial stigmata of alcoholics which are probably most often the result of prolonged drinking frequently have come to be considered as causes of the disease *Treatment and Rehabilitation of the Chronic Alcoholic* Benjamin Kissin,2012-12-06 The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy The latter may indeed be true but we cannot use what we do not know and must use what we do know We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary If this is true then probably most of this book has validity With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series *The Biology of Alcoholism* As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work

The Alcoholic Society Reece McGee, 2017-07-12

Offering a unique theoretical foundation to understanding the lived experience of the active alcoholic Denzin asserts that alcoholism is a disease in which negative emotions divide the self into warring inner factions fueled and distorted by alcoholic intoxication The work is solidly anchored in a long term study of the socialization experiences that began in alcoholism treatment centers and continue in Alcoholics Anonymous recovery programs It covers the treatment process the restructuring of self the alcoholic s interaction with his recovery treatment program and the modalities of self transcendence that result from treatment

Research Advances in Alcohol and Drug Problems Reginald G. Smart, Howard D. Cappell, Frederick B Glaser, Yedy Israel, Harold Kalant, Robert E. Popham, Wolfgang Schmidt, Edward M. Sellers, 2013-03-13

This volume is the eighth in the Research Advances Series and the fifth published by Plenum Press The purpose of the series

is to review new work in rapidly changing fields We do not expect reviews to cover the whole field of work on alcoholism and addiction Nor do we expect that they will be like annual reviews covering all work in a delimited field Our reviews are designed to explore only the most exciting parts of the total field and to focus on conclusions that can be made about them The series publishes one volume each year Volume 8 is an omnibus rather than a theme volume in that a wide range of topics is covered including research on alcohol opiates and tobacco As usual the greater emphasis is on alcohol research reflecting the importance of the problem and the volume of work to be reviewed With Volume 8 come some changes in the Editorial Board It will be the last volume in the series for Robert E Popham who has resigned from the Board He has been with the series since its inception and has contributed a great deal to its development The members of the Board are grateful for his help We are adding two new members Dr Howard Cappell whose field is experimental psychology and Dr Edward M Sellers in clinical medicine and pharmacology

Research on Alcoholism: Clinical Problems and Special Populations Morris E. Chafetz, 1973 **Social Aspects of Alcoholism** Benjamin Kissin, Henri Begleiter, 2013-06-29 The first three volumes of this series have dealt with materials which generally justify the title The Biology of Alcoholism This is only remotely true of the present volume Social Aspects of Alcoholism or of the final volume to come Treatment and Rehabilitation Except for small portions of the treatment section which involve pharmacotherapy much of these last two volumes deals with the psychological aspects of alcoholism and still more with the social It is interesting to review the evolution of this new pattern over the past seven years a pattern which had it existed initially would have resulted if not in a different format at least in a different title Our initial selection of areas to be covered was influenced by our desire to present as hard data as possible in an attempt to lend a greater aura of scientific rigor to a field which was generally considered as soft When we completed our review of this material in volumes 1-3 we recognized that what we might have gained in rigor we had more than lost in completeness These volumes presented a picture of a biological disease syndrome for which the remedies and preventive measures were presumably also biological And yet most workers in the field readily accept the significant contributions of psychological and social factors to the pathogenesis and treatment of alcoholism [Catalog of Copyright Entries, Third Series](#) Library of Congress.
