point of view Jesus cannot be considered as the son of God Therefore some of his statements reported in the Gospels appear to be particularly insane Let us quote The Father is in me and I am in the Father I am the bread of life that comes down from heaven He who eats my flesh and drinks my blood has eternal life A first question arises what was the psychic illness of the one who uttered such words Based on the Gospels the author follows Jesus in his daily life in his actions and words This investigation reveals Jesus pathologies schizophrenia he withdraws from the world and builds another one in its place anal

character a stage of infantile development characterized by a binary Manicheism let us remember that he who is not with me is against me and an extreme concern for order aggressive paranoia Finally Jesus can be diagnosed clinically as a mega paranoid i e a paranoid producing mythical projections Jesus was phenomenally successful during his lifetime and over the centuries At this point another question arises How did he manage to convince the crowds For the author the mythical projections of Jesus came to speak directly to the unconscious of the crowds The obsessive neuroses present in this collective and individual unconscious were channeled into the promises of Jesus who assured in exchange for belief in his person purification eternal life and social reversal The key to the success of Jesus would thus reside in a fortuitous meeting between structures of the unconscious These structures remaining identical through time explains the timeless success of Christianity With humor and erudition Fr d ric Joi offers us a rational explanation of mass religious behavior that he does not hesitate to bring closer to the contemporary political field and the concept of crowd manipulation To conclude his essay he proposes in the form of a questionnaire to test the capacity of each one to be a prophet Fr d ric Joi is the author of *Mahomet tait il fou* Max Milo 2010 Doctor in psychology and professor of philosophy he offers a psychological analysis and a philosophical critique of the founders of religion based in particular on the theories of Freud and Nietzsche

The Publishers' Trade List Annual ,1968

Color of the Skin Mitiku Ashebir,2017-10-25 *Color of the Skin* talks about the color of human skin which ironically does not exist However rather than rejecting the premises of traditional awareness about skin color the book uses existing perceptions as departure points in examining the inherent characteristics and social trappings surrounding skin color The book defines the subject namely color of the skin with considerable precision elaborating on its various aspects by dialing forward accounts of ponderings that occurred far back in time and place but that are still fresh and substantive It successfully distills a few fundamental concepts that widely contrast in some instances clash with existing popularly known and commonly understood notions concerning skin color The book provides comparative descriptions in settings representing two countries Ethiopia where color of the skin is straightforward literal and simple where it is used primarily for identifying people and the United States where color of the skin is heavily loaded complex formal institutionalized and often political The parameters in each abode provide adequate details indicating the scope and implications of the consequences of the resultant attitudes actions and practices thereof especially in the latter The author proposes that color is a continuum by hosting a virtual tour through reading trips from the equator out in four directions north east west and south narrating all the way describing and interpreting the topography of human color which cascades in all directions Further the writer suggests that no two persons will have the same color tone spread and texture This is equivalent to saying that there is an individual color but there is no group color It is close to saying that color of the skin is like fingerprints each person s being different from the next So the gross color division of black and white may be salvaged only when used for convenience and only for immediate references Any effort to institutionalize and formalize color betrays its natural constitution and thereby

compounds the social economic and political problems that it has caused Progressively the book postulates credible concepts that demonstrate grouping people into black and white is arbitrary is subjective and worse in very significant ways is often prodded with intentional and exploitive motives The book invites readers to imagine the reverse of the current world order surrounding the color of skin putting everyone in good view to appreciate what the world might look like if fortunes tagged to color lines were overturned around the world The scenario presented under the section Imagining the Reverse is one of the light parts of the book but at its core the discourse here is indeed about a very serious matter The author observes that the various configurations used to differentiate countries by slicing them into developed and developing and second and third world countries follow skin color contours The issue of skin color is elevated to international levels drawing plausible conclusions that unfortunately the disadvantages of such perspectives outweigh the advantages The perceptions derived from such consensus affect world outlook on a number of issues immigration bilateral and multilateral economic relations and individual country s aspirations to mention a few perhaps rendering faulty designs on a national and international scale The writer takes futuristic perspective touching on global warming never mind the causes for now flagging it as a colossal development that can have an impact on the color of the skin big time In this vein the author surmises that global warming is likely to relentlessly rub against the human skin turning lighter skin to dull Brown may be the universal color of the future The principal motivation of going the distance the book has stretched to pursuing the issue of skin color is to ameliorate the stark differences biases and prejudices that old positions have unabatedly generated for a long time both in specific countries and worldwide Accordingly a few indicators that are considered to be harbingers of a friendlier cohesive fair peaceful and prosperous world have been identified The layout of the preferences to achieve a new positive and more functional world order leans on cooperation understanding collaboration and peace all demands of global realities of today and tomorrow The discussions that close the book in addition to heralding where the author is going with the stretch of ideas on color of skin demonstrate that integration the impetus for the book is a two way traffic and cannot happen without all parties involved being intentional and prepared to change Often life is about overcoming differences and savoring similarities Where there are differences changes and adaptations are required The section on integration demonstrates this phenomenon Tangentially the book also offers unassuming proposition for peace between Israel and Palestine and a point of view for restructuring the US refugee program

Beyond Priests Paul Collins, 2025-02-18 Beyond Priests contends that the requirements of the clerical priesthood of the Catholic Church that all priests must be male and that all priests must be celibate is a gross distortion of scripture and the church s early history that must be changed While the roots of the modern priesthood go back to the fourth century and even more remotely to the presbyters or elders who advised local bishops in the early church the contemporary priestly model is very much the product of seventeenth century French reformers acting to apply a 1563 decree on the priesthood of the Council of Trent The present day priestly model has increasingly become harmful even toxic

not only to priests themselves but to the ministry and the Catholic community Based on the historical analysis Beyond Priests outlines a whole new way of approaching ministry and leadership that is in tune with contemporary needs is inclusive of women and men and is more authentically derived from the New Testament and the early church **The Social Mission of Charity** William Joseph Kerby,1921 *The Growth of the Mind* K. Koffka,2013-11-05 This is Volume VIII of thirty two of a series on Developmental Psychology Originally published in 1924 this offers a study on the introduction to Child Psychology translated from the Author s Gestalt Psychologie where he shares his hypothesis in explaining the problems of childhood and mental growth **American Book Publishing Record Cumulative, 1950-1977: Title index** R.R. Bowker Company. Department of Bibliography,1978 **Great Christian Thinkers** Pope Benedict XVI,2011 From Clement of Rome to today the project of understanding the faith has engaged and impelled some of the West s greatest minds Here Pope Benedict XVI accessibly and sympathetically reflects on the lives and works of Christianity s chief theologians teachers ascetics and mystics up to the end of the Middle Ages
