## **Personality Development In Adulthood:**

**Personality Development in Adulthood** Lawrence S. Wrightsman, 1988-06-01 After many years of neglect the nature of personality development in adulthood is now recognised as a topic worthy of scholarly attention Designed as a text for advanced undergraduate and graduate courses on adulthood Personality Development in Adulthood first elucidates three common approaches to adult personality development early formation theories such as psychoanalysis and Berne's life script theory stage theory of psychosocial development represented by Erikson dialectic analysis which poses on going irreconcilable tensions between basic needs Each approach is described the methods used to evaluate them considered and the quality of evidence examined The second half of the book applies concepts *Adult Personality Development* Lawrence S. Wrightsman, 1994-03-15 These stimulating companion volumes reflect an expansion of the coverage of Wrightsman's earlier book Personality Development in Adulthood They encourage readers to look at the evolving nature of their own lives and include case studies throughout to illustrate concepts in a thought provoking non technical manner **Personality Development from Infancy to Adulthood** Charles Wenar, 1971 **Personality Development Across the Lifespan** Jule Specht, 2017-03-17 Personality Development across the Lifespan examines the development of personality characteristics from childhood adolescence emerging adulthood adulthood and old age It provides a comprehensive overview of theoretical perspectives methods and empirical findings of personality and developmental psychology also detailing insights on how individuals differ from each other how they change during life and how these changes relate to biological and environmental factors including major life events social relationships and health The book begins with chapters on personality development in different life phases before moving on to theoretical perspectives the development of specific personality characteristics and personality development in relation to different contexts like close others health and culture Final sections cover methods in research on the topic and the future directions of research in personality development Introduces and reviews the most important personality characteristics Examines personality in relation to different contexts and how it is related to important life outcomes Discusses patterns and sources of personality development **Personality Development in Adulthood** Petar Milojev, 2016 The development of personality in adulthood remains a topic of debate with direct implications for the conceptualisation of personality traits McCrae Roberts et al 2008 However with notable exceptions comprehensive longitudinal investigations of the development of personality traits across a broad range of the adult life span are surprisingly rare Through four systematic longitudinal investigations the present thesis investigates the change and stability in the Big Six personality traits Extraversion Agreeableness Conscientiousness Neuroticism Openness to Experience and Honesty Humility in a nationally representative panel study of adult New Zealanders Study 1 demonstrated the very high stability of the six traits thus confirming the prediction of high temporal stability of personality traits This study also provided the crucial test of the test retest reliability of the personality scales used throughout this thesis Study 2 demonstrated the

systematic variability in the stability of personality traits across the adult life span That is personality traits tend to stabilise across younger adulthood reach peak stability in middle age i e late 40 s and early 50 s and systematically destabilise thereafter The findings of Study 3 indicated remarkable consistency in personality traits associated with a major natural disaster namely the 2010 2011 Earthquakes in Canterbury New Zealand The only meanlevel change from before to after the earthquakes was a small decrease in Emotional Stability or an increase in Neuroticism among those affected by the event Finally Study 4 investigated normative patterns of mean level change in personality traits and identified distinct developmental trajectories for the different traits with changes occurring across the entire adult life span Collectively these studies paint an interesting picture of both stability and change in personality traits highlighting the need for an integrated perspective on personality development one that incorporates both the intrinsic stability of the construct and early development as well the continuing process of change

partners Taking their cue from Erik Erikson's model of adolescent and adult development the authors show readers exactly how a life story approach can illuminate the distinctive features of an individual's personality and development during this formative phase of life Organized around a set of life contexts where personality is manifested i.e. adjustment personal ideology close relationships occupation and civic life this book draws on the authors own longitudinal research on the development of the life story in emerging adulthood Throughout the book they incorporate fascinating case studies and historical examples e.g. Darwin Pope Francis Martin Luther King Jr Jane Fonda of individuals unique development during this period of life in order to better illustrate the application of this approach to understanding the whole person in context
