Personnel Travel Greenhouse Effect:

Personal Transport and the Greenhouse Effect Peter Hughes, 2013-11-05 The issue of sustainability in the developed world is nowhere more critical than in the field of personal travel which in many countries has become the fastest growing contributor to global warming Unless the use of cars can be brought under control there is little chance of meeting government targets for reducing greenhouse emissions *Personal Transport and the Greenhouse Effect* sets out the steps that could be taken to lessen the conflict between personal mobility and long term environmental security It provides a detailed analysis of the policy options available for limiting carbon dioxide emissions and highlights the limitations of technological measures in solving the problem Instead the book s 12 point plan for sustainability shows how a significant reduction in emissions requires the use of all the policy measures available This valuable contribution to a crucial area of debate covering energy transport policy and the environment will be essential reading for policy makers planners and students alike Peter Huges is deputy editor of *Local Transport Today* and has contributed to a wide range of publications including *The Daily Telegraph* *The Guardian* *New Scientist* and *Energy Policy* Originally published in 1993

Lean and Cleaner Production Peng Wu, Sui Pheng Low, 2013-12-18 This book explains how in moving towards Cleaner Production the Lean Production Philosophy can be applied to reduce carbon emissions in prefabrication one major source of the Greenhouse Gas GHG emissions which contribute to global climate change This book examines theories and principles in the Lean Production Philosophy to develop situation based carbon reduction strategies for precast concrete manufacturers and contractors in terms of Site layout Supply Chain Production Stocks and Installation Management It presents the empirical findings of surveys and case studies with managers and professionals working for precasters and contractors in Singapore findings which provide good practical guidance for precast concrete manufacturers and contractors to achieve low carbon emissions and to perform better in many sustainability based rating systems such as the Singapore Green Labelling Scheme and the Building and Construction Authority BCA Green Mark Scheme
