Library,1960 Understanding Korean Public Administration Kwang-Kook Park,Wonhee

Lee,Seok-Hwan Lee,2016-06-17 Although much has been written about the Korean public administration the international academic community has little knowledge about it as most of the literature has been written in Korean This book aims to provide more accessible knowledge internationally by filling that gap covering both the history and the current status of the Korean public administration This book is a collaboration of many Korean public administration scholars and would appeal to those interested in the secrets of Korea s rapid development in such a short span of time Each chapter covers historical contexts key to understanding its public administration and an important aspect as Korea is a fast changing society The book takes on a more pragmatic approach rather than to put the Korean experiences into the western theory Each chapter therefore provides an extensive discussion on the lessons learned and practical implications Human Performance on the Flight Deck Don Harris,2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between

the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system containing chapters on pilot selection simulation and training stress fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area
