## **Perspecta 32 The Yale Architectural Journal:**

**A Consumers' Republic** Elizabeth Cohen, 2008-12-24 In this signal work of history Bancroft Prize winner and Pulitzer Prize finalist Elizabeth Cohen shows how the pursuit of prosperity after World War II fueled our pervasive consumer mentality and transformed American life Trumpeted as a means to promote the general welfare mass consumption quickly outgrew its economic objectives and became synonymous with patriotism social equality and the American Dream Material goods came to embody the promise of America and the power of consumers to purchase everything from vacuum cleaners to convertibles gave rise to the power of citizens to purchase political influence and effect social change Yet despite undeniable successes and unprecedented affluence mass consumption also fostered economic inequality and the fracturing of society along gender class and racial lines In charting the complex legacy of our Consumers Republic Elizabeth Cohen has written a bold encompassing and profoundly influential book

**Journal of the Society of Architectural Historians** Society of Architectural Historians, 1947 Includes special issues **Perspecta**, 1966 **Perspecta 8** Jonathan Barnett, Michael Dobbins, Yale University. School of Art and Architecture, 1963 Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book *2005 ACSA SW Regional Proceedings - IMPROVISATION* Southwestern Region, 2006-05 2005 ACSA SW Regional Proceedings IMPROVISATION Lafayette LA

**Untimely Moderns** Eeva-Liisa Pelkonen, 2023-01-01 A novel exploration of the idea of nonlinear time and its place at the heart of modern art and architecture Through much of the twentieth century a diverse group of thinkers engaged in an interdisciplinary conversation about the meaning of time and history for modern art and architecture The group included architects Louis Kahn Everett Victor Meeks James Gamble Rogers Paul Rudolph and Eero Saarinen artists Anni and Josef Albers philosopher Paul Weiss and art historians Henri Focillon George Kubler Sibyl Moholy Nagy and Vincent Scully These figures were unified by their resistance to the idea that to be considered modern art and architecture had to be of its time as well as by the pivotal role that Yale University held as a backdrop to their thinking These thinkers sponsored a new kind of approach one that Eeva Liisa Pelkonen terms untimely emphasizing a departure from a sequential course of events Ideas about temporal duration new tradition the presence of the past and the shape of time

were among the concepts they explored With an interdisciplinary focus Pelkonen reveals previously unexplored connections among key figures of American intellectual and artistic culture at midcentury whose works and words would shape modern architecture     *Modern Architecture and Other Essays* Vincent Scully,2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully s incalculable contribution 300 illustrations     *Perspecta* 27 Roberto H. De Alba,1993-01-01     Camera Constructs Andrew Higgott,Timothy Wray,2016-12-05 Photography and architecture have a uniquely powerful resonance architectural form provides the camera with the subject for some of its most compelling imagery while photography profoundly influences how architecture is represented imagined and produced Camera Constructs is the first book to reflect critically on the varied interactions of the different practices by which photographers artists architects theorists and historians engage with the relationship of the camera to architecture the city and the evolution of Modernism The title thus on the one hand opposes the medium of photography and the materiality of construction but on the other can be read as saying that the camera invariably constructs what it depicts the photograph is not a simple representation of an external reality but constructs its own meanings and reconstructs its subjects Twenty three essays by a wide range of historians and theorists are grouped under the themes of Modernism and the Published Photograph Architecture and the City Re imagined Interpretative Constructs and Photography in Design Practices They are preceded by an Introduction that comprehensively outlines the subject and elaborates on the diverse historical and theoretical contexts of the authors approaches Camera Constructs provides a rich and highly original analysis of the relationship of photography to built form from the early modern period to the present day     **The Mourning After** Neil Edward Brooks,Josh Toth,2007 Have we moved beyond postmodernism Did postmodernism lose its oppositional value when it became a cultural dominant While focusing on questions such as these the articles in this collection consider the possibility that the death of a certain version of postmodernism marks a renewed attempt to re negotiate and perhaps re embrace many of the cultural literary and theoretical assumptions that postmodernism seemly denied outright Including contributions from some of the leading scholars in the field N Katherine Hayles John D Caputo Paul Maltby Jane Flax among others this collection ultimately comes together to perform a certain work of mourning Through their explorations of this current epistemological shift in narrative and theoretical production these articles work to get over postmodernism while simultaneously celebrating a certain postmodern inheritance an inheritance that can offer us important avenues to understanding and affecting contemporary culture and society     *The Encyclopedia of Housing, Second Edition* Andrew T. Carswell,2012-05-31 Since publication of the groundbreaking Encyclopedia of Housing in 1998 many issues have assumed special prominence within this field and indeed within the global economy For instance the global economic meltdown was spurred in large part by the worst subprime mortgage crisis we ve seen in our history On a more positive note the

sustainability movement and green development has picked up considerable steam and given the priorities and initiatives of the current U S administration this will only grow in importance and increased attention has been given in recent years to the topic of indoor air quality Within the past decade as well the Baby Boom Generation began its march into retirement and senior citizenship which will have increasingly broad implications for retirement communities and housing assisted living facilities aging in place livable communities universal design and the like Finally within the last twelve years an emerging generation of young scholars has been making significant contributions to the field For all these reasons and more we are pleased to present a significantly updated and expanded Second Edition of the Encyclopedia of Housing

Architecture as Communication Ross A. Eaman, 2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate

William Alvis Brogden,2016-12-05 When considering the successful design of cities the focus tends to be on famous examples such as Paris or Rome with equally successful but smaller and more remote examples being ignored In addition the more diffuse patterns of settlement of the north and western parts of Europe are hardly considered at all in comparison to the tightly formed urban centres of the Mediterranean However the diffuse town region is typical of our time whatever the location By analysing the development of a successful small city of ancient foundation which grew from a diffuse long settled and dense landscape then demonstrated a slow growth as a tight urban form before an early adoption of the designed landscape as town lessons can be learned These lessons may be useful in addressing the nature and growth of any city or city region The story of Aberdeen is just such an example Not only are the materials for its long history present its relations and concerns with the wider world are also well attested and many of the ideas which directed or significantly impinged on the design of cities were tested there or had their origin there As its form accumulated and developed over such a long time Aberdeen also suggests the idea of an architecture of the city This book examines the development and design of a city from three inescapable aspects its location and character of the landscape its own particular history of development and its cultural responses to various waves of thought *Architectural Possibilities in the Work of Eisenman* Michael
