Perspective : History, Evolution, Techniques ,1982 **Evolution: A Big History Perspective** Leonid E. Grinin,Andrey V. Korotayev,Barry H. Rodrigue,2011-09-29 This issue of the almanac aims at filling the gap in the mega evolutionary research The Editors believe that the present Almanac which brings together scientists working in different areas of the vast evolutionary field will hopefully make a contribution to this process The contributions to this volume are subdivided into three sections Universal Evolution Biological and Social Forms of Evolution Connections and Comparisons and Aspects of Social Evolution Subjects and issues of the contributions to all three sections have a great deal in common and significantly supplement each other **Envisioning Architecture** Iain Fraser,Rod Henmi,1993-12-16 Examples of world renowned masters of architecture are used in this enlightening book that explores the why of architectural drawing rather than the how By emphasizing the value of drawing over technique the authors demonstrate how the drawing itself influences the designer s processes of thought and exerts its own pull on the evolution of the concept *Molecular Markers, Natural History and Evolution* J. C. Avise,2012-12-06 Molecular approaches have opened new windows on a host of ecological and evolutionary disciplines ranging from population genetics and behavioral ecology to conservation biology and systematics *Molecular Markers Natural History and Evolution* summarizes the multi faceted discoveries about organisms in nature that have stemmed from analyses of genetic markers provided by polymorphic proteins and DNAs The first part of the book introduces rationales for the use of molecular markers provides a history of molecular phylogenetics and describes a wide variety of laboratory methods and interpretative tools in the field The second and major portion of the book provides a cornucopia of biological applications for molecular markers organized along a scale from micro evolutionary topics such as forensics parentage kinship population structure and intra specific phylogeny to macro evolutionary themes including species relationships and the deeper phylogenetic structure in the tree of life Unlike most prior books in molecular evolution the focus is on organismal natural history and evolution with the macromolecules being the means rather than the ends of scientific inquiry Written as an intellectual stimulus for the advanced undergraduate graduate student or the practicing biologist desiring a wellspring of research ideas at the interface of molecular and organismal biology this book presents material in a manner that is both technically straightforward yet rich with concepts and with empirical examples from the world of nature **Mechanisms of Life History Evolution** Thomas Flatt,Andreas Heyland,2011-05-12 This interdisciplinary volume unites evolutionary and molecular biologists from various fields life history theory molecular biology developmental biology aging phenotypic plasticity social behaviour and endocrinology who use studies of molecular mechanisms to solve fundamental questions in life history evolution in a variety of organisms **The Islamic Design Module in Latin America** John F. Moffitt,2004-07-15 This study analyzes the distinctive look of Hispanic architecture Its triangulate format originated in Islamic Spain was based on workshop techniques once used by journeyman designers and simple artisans Spain was the

only European transatlantic colonial power to have once been occupied by Islamic overlords Spain's conquistadors took their traditional building methods to Latin America Formal analyses of the facades of various Latin American churches reveal them to reiterate procedures worked out in Andalusia by Islamic builders in the ninth and tenth centuries Though widely separated by time and place both share a proportionate system determining abstract ratios in both cases this regulating format was derived from manipulations of the Pythagorean triangles This trazado regulador is only expressed in ratios with no numbers and is illustrated here with 85 visual examples including measured drawings of Egyptian Greek Roman and medieval European prototypes Grounded in historical and physical data the research is partially drawn from four practical builders manuals two seventeenth century Spanish ones and two Mexican ones from ca 1640 and 1800 In an appendix Viollet le Duc a major nineteenth century architect explains architectural proportionality and the design function of the Pythagorean Triangle
