L. Cooper,2021-07-04 Featuring contributions from leading experts in software engineering this

edited book provides a comprehensive introduction to computer game software development. It is a complex interdisciplinary field that relies on contributions from a wide variety of disciplines including arts and humanities, behavioural sciences, business, engineering, physical sciences, mathematics, etc. The book focuses on the emerging research at the intersection of game and software engineering communities. A brief history of game development is presented, which considers the shift from the development of rare games in isolated research environments in the 1950s to their ubiquitous presence in popular culture today. A summary is provided of the latest peer-reviewed research results in computer game development that have been reported at multiple levels of maturity: workshops, conferences, and journals. The core chapters of the book are devoted to sharing emerging research at the intersection of game development and software engineering. In addition, future research opportunities on new software engineering methods for games and serious educational games for software engineering education are highlighted. As an ideal reference for software engineers, developers, educators, and researchers, this book explores game development topics from software engineering and education perspectives.

Key Features Includes:

- contributions from leading academic experts in the community
- Presents a current collection of emerging research at the intersection of games and software engineering
- Considers the interdisciplinary field from two broad perspectives: software engineering methods for game development and serious games for software engineering education
- Provides a snapshot of the recent literature (i.e. 2015-2020) on game development from software engineering perspectives

Smart Universities in Smart Cities Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-06-30

Smart Universities in Smart Cities: Shaping the Future of Education and Urban Innovation focuses on how higher education institutions are adapting to the challenges of the digital age in a world increasingly influenced by technology and sustainability. Universities are becoming an indispensable element of smart cities, driving forward innovation, sustainability, and urban living. The book explores how emerging technologies such as AI, IoT, and blockchain are transforming campuses into dynamic, data-driven ecosystems. Both of these dimensions are studied through data analytics, case studies, and futuristic thinking perspectives to identify opportunities and challenges of the establishment of smart universities within the broader ecosystem of smarter cities. The book offers a holistic approach to planning educational institutions, covering issues such as sustainable campus development, digital learning environments, and smart mobility solutions. As universities undergo digital transformation, they advance not only learning but also the larger role of academia in society. The book envisions the future where intelligent campuses act as centres of knowledge, collaboration, and sustainable development, propelling the world into a smarter and more inclusive reality for future generations. It will be of interest to researchers and students of urban planning and sustainability studies, as well as to urban planners and policymakers.

Perspectives from Europe and Asia on Engineering Design and Manufacture Xiu-Tian Yan, Cheng-Yu Jiang, Neal P. Juster, 2004-04-30

This book will be the first proceedings of a series of symposia on the exchange of best practices and research in engineering design and manufacture.

organized focusing on Europe and Asia by a group of researchers from European and Asian Universities working on several EU funded projects This very first book will explore the difference and communalities of European and Asian research and practice in this very important field With the rapid economic expansion of Asia and the gradual shift of manufacturing from Europe and the USA to Asia this Symposium will provide a timely forum for leading researchers in the field to exchange their research findings and experience The book covers this first symposium and aims to give insights to these on going changes shows their implications from design and manufacture perspective for both Europe and Asia and identifies new research topics to improve industrial practice The primary audience of this book are researchers in the field of engineering design and manufacture industrialists and business persons who are interested in finding out the state of design and manufacture in Asia and Europe
