Over the past decade, decarbonization and environmental issues have taken a key role in worldwide politics. In particular, the European Union (EU) declared its strong commitment to take the lead in the energy transition process. European policymakers aim at a low-carbon future and reduction of greenhouse gas emissions. After the Paris Agreement, the European Commission started a significant review of the European energy regulatory framework to accelerate the transition from fossil fuels to clean energy, promoting renewable energy as one of the pillars of a decarbonized energy system. In 2019, the European Commission finalized the “Clean Energy for all Europeans Package” (CEP), a framework of eight legislative acts that shape the EU energy policies, establishing a 40% reduction in greenhouse gas emissions and a 32.5% improvement in energy efficiency as targets for 2030.

In this context, it should be noted that most of the European buildings are multi-unit buildings, responsible for 40% of the whole energy consumption. The European Commission set as a target that about 50% of buildings’ energy demand should be covered by Renewable Energy Sources (RESs). The aggregation of users into Renewable Energy Communities (RECs) represents an efficient solution toward this goal. The European Directive 2018/2001—also known as Renewable Energy Directive (RED II)—represents a fundamental step for the clean energy transition since it recognizes Energy Communities (ECs) at the European level.

The IEEE International Conference on Environment and Electrical Engineering (IEEEICE) welcomes and encourages research activities from this perspective. The present editorial reviews the most significant contributions published in the special issue of MDPI *Energies*, “Selected Papers from 20th IEEE International Conference on Environment and Electrical Engineering (IEEEICE 2020)”.

Besides economic and political interests involved in energy production from conventional sources, the actual scarce availability of fossil fuels and the environmental impact of energy produced by non-RESs have endorsed more focused attention on polluting agents and clean energy, yet helping broaden the horizons towards measures favoring better life quality and working conditions for the workers. In ref. [1], solar radiance sensors were employed to estimate the levels of occupational irradiance for open-air workers. The study, revealing dangerous exposure levels, was conducted with a population of three workers in Italy, equipped with personal dosimeters to monitor UVA and UVB/C irradiance for 23 working days.

In this complex transitional context, a key factor is represented by data gathering and management to predict energy production and consumption and prevent power plants’ reduced performance by detecting inefficiencies and abnormal operating conditions. Thermographic non-destructive tests (TNDTs) are employed to detect soiling, debris, and dust, causing a reduction in the solar radiation reaching the PV cells, and hot spots,

Advances in Environment and Sustainability: Addressing Global Challenges Ahmed J. Obaid, Marita Ika Joesidawati, Sabeeh Lafta Farhan, Emad A. M. Salih Al-Heety, Neyara Radwan, 2025-07-18 This book serves as a platform for in depth discussions and presentations on various critical issues including effective management strategies for environmental pollution across air water and soil innovative approaches to mitigate and adapt to climate change impacts conservation and restoration of biodiversity and fragile ecosystems advancements in renewable energy technologies and sustainable resource management and the application of environmental biotechnology and biochemistry in solving environmental problems The 2nd International Conference on Environment and Sustainability Technologies ICEST 2024 is a pivotal gathering of global experts and researchers committed to addressing pressing environmental challenges Participants will engage in sharing cutting edge research findings practical solutions and policy implications aimed at fostering sustainable development practices worldwide The 2nd ICEST will convene in Indonesia due to the country s strategic location in Southeast Asia which faces significant environmental challenges such as deforestation biodiversity loss and climate vulnerability Indonesia serves as a critical case study for understanding and addressing these issues making it an ideal host for discussions on sustainable development and environmental protection Moreover the conference is supported by international academics from various countries that also confront similar environmental challenges These scholars bring diverse perspectives and expertise enriching the conference with insights and solutions applicable globally Their involvement underscores the conference s commitment to fostering international cooperation and knowledge exchange in tackling shared environmental and sustainability issues Together the conference in Indonesia and its international academic support catalyze actionable initiatives and collaborations that promote environmental resilience and sustainable development across borders

Sustainable Production: Novel Trends in Energy, Environment and Material Systems Grzegorz M. Królczyk, Małgorzata Wzorek, Anna Król, Orest Kochan, Jun Su, Janusz Kacprzyk, 2019-01-24 This book highlights recent research on sustainable production In today s manufacturing industry cleaner production has become a central goal Sustainable production describes activities that pose no threat to future generations and are not pursued at their expense In addition sustainable production is a concept that can improve environmental performance and focuses on technical aspects that can be used to improve efficiency and productivity Sustainable production is not limited to the manufacturing sector but affects all production sectors including energy environment and material systems all of which face significant challenges in connection with sustainability e g efforts to reduce production s impact on the environment and to manage health and safety impacts Key means of reducing environmental pollution from manufacturing involve reducing the main resources used in production metals used in the machining processes fluids oils in production water and energy

Current Trends in Environmental Psychology, volume I, 2nd edition Giuseppe Carrus, Eugenio De Gregorio, Frederica Caffaro, Sabine Pirchio, Lorenza Tiberio, 2023-07-18 This Research Topic is linked to the 3rd International Conference of Environmental Psychology ICEP 2021 to be held in Siracusa Italy 4-9 October 2021. The ICEP is one of the most important scientific events in the global community for experienced scholars, junior researchers and professionals working in the field of Environmental Psychology across the world. Submissions to this Research Topic welcome but are not limited to works that have been presented on site and virtually at the ICEP 2021. Research Topic articles will be published immediately once accepted in the journal. This Research Topic aims to promote the scientific debate over the most recent empirical findings and theoretical advances in Environmental Psychological science and to build evidence based knowledge and innovative approaches to understand the relationship between humans and their socio physical environments. It aims at hosting empirical and theoretical works that contribute to advancing our scientific knowledge on some of the most urgent challenges of contemporary human society. Chemistry of Phytopotentials: Health, Energy and Environmental Perspectives LD

Khemani, MM Srivastava, Shalini Srivastava, 2011-12-02 Since the beginning of human civilization plants have been our true companions. Plants contribute not only to our existence but also serve us through discovery, design and the treatment of various diseases where there is no satisfactory cure in modern medicine. This has focused Natural Product Chemists to unravel plants' therapeutic potential in the light of modern analytical and pharmacological understandings. Presence of multiple active phytochemicals in medicinal plants offers exciting opportunity for the development of novel therapeutics providing scientific justification for their use in traditional medicines. Non food plants have been recognized as biofactories for the production of eco friendly value added materials including agricultural food products, enzymes, nutraceuticals etc. They have also been widely explored for personal care, industrial products and sources of energy generation. The proven efficacy of botanicals has been appreciated by the scientific community and strengthened plant human relationship. The synergism in the Phytoproducts, the result of the interaction of two or more moieties, is not simply additive but multiplicative. Recent acceptance of the Food and Drug Administration US for herbal medicine based preparation has renewed interest in Natural Product Research. The year 2011 is declared as the International Year of Chemistry IYC 2011 by the United Nations Assembly. On this occasion the present conference CPHEE 2011 aims to offer chemists from diverse areas to come to a common platform to share the knowledge and unveil the chemistry and magic potentials of phytoproducts for the mankind.

Environmental Health Perspectives, 2004-07 *Energy, Environment and Transitional Green Growth in China* Ruizhi Pang, Xuejie Bai, Knox Lovell, 2018-04-27 This book discusses energy use and its environmental footprint in China as well as issues concerning the transitional green growth of its economy, a subject of great importance in light of China's size and its impressive record of economic growth. The book includes expert overviews and empirical studies prepared by internationally recognized experts in the field. The empirical techniques utilized by the contributors include econometrics, mathematical

Perspectives Energy Environment 2 E Introduction

In today's digital age, the availability of Perspectives Energy Environment 2 E books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Perspectives Energy Environment 2 E books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Perspectives Energy Environment 2 E books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Perspectives Energy Environment 2 E versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Perspectives Energy Environment 2 E books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Perspectives Energy Environment 2 E books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Perspectives Energy Environment 2 E books and manuals is

Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Perspectives Energy Environment 2 E books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Perspectives Energy Environment 2 E books and manuals for download and embark on your journey of knowledge?
