The French Revolution in Global Perspective Suzanne Desan, Lynn Hunt, William Max Nelson, 2013-04-15 The French Revolution in Global Perspective illuminates the dense connections among the cultural social and economic aspects of the French Revolution revealing how new political forms at once democratic and imperial anticolonial and centralizing were generated in and through continual transnational exchanges and dialogues Situating the French Revolution in the context of early modern globalization for the first time this book offers a new approach to understanding its international origins and worldwide effects A distinguished group of contributors shows that the political culture of the Revolution emerged out of a long history of global commerce imperial competition and the movement of people and ideas in places as far flung as India Egypt Guiana and the Caribbean This international approach helps to explain how the Revolution fused immense idealism with territorial ambition and combined the drive for human rights with various forms of exclusion The essays examine topics including the role of smuggling and free trade in the origins of the French Revolution the entwined nature of feminism and abolitionism and the influence of the French revolutionary wars on the shape of American empire

French Muslims in Perspective Joseph Downing, 2019-05-24 With the largest Muslim population in Western Europe France has faced a number of critiques in its attempts to assimilate Muslims into an ostensibly secular but predominantly Catholic state and society This book challenges traditional analyses that emphasise the conflict between Muslims and the French state and broader French society by exploring the intersection of Muslim faith with other identities as well as the central roles of Muslims in French civil society politics and the media The tensions created by attacks on French soil by Islamic State have contributed to growing acceptance of the Islamophobic discourse of Marine Le Pen and her far right Front National party and debates about issues such as headscarves and burkinis have garnered worldwide attention Downing addresses these issues from a new angle eschewing the traditional us and them narrative and offering a more nuanced account based on people's actual lived experiences French Muslims in Perspective will be of interest to students and scholars across sociology politics international relations cultural studies European Studies and French studies as well as policy makers and practitioners involved in immigration education and media

French Civil Liability in Comparative Perspective Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26 The French law of torts or of extra contractual liability is widely seen as exceptional For long it was

based on a mere five articles of the Civil Code of 1804 but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance While the rest of the general law of obligations including contract in the Civil Code was reformed in 2016 by executive ordonnance this area was left aside being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability a new legislative category to include both contractual and extra contractual liability This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems In doing so it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future *Perspectives on Garden Histories* Michel Conan,1999 Garden history is a discipline of contested purposes *Perspectives on Garden Histories* contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline **Les français d'ici en perspective** Davy Bigot,2020-10-28T00:00:00-04:00 Du fran ais parl au Nouveau Brunswick au fran ais qu b cois du fran ais en usage l poque coloniale au fran ais twitt de l enseignement de la diction la variation stylistique en entrevue voil autant de perspectives pr sent es dans ce collectif qui rassemble huit textes originaux centr s sur le fran ais en Am rique du Nord Qu il s agisse de phonologie de morphosyntaxe ou encore du contact des langues ce volume couvre de nombreux champs de la linguistique partir de points de vue historiques et contemporains Les questions pos es par les auteurs sont nombreuses et les r ponses fournies nous clairent non seulement sur la pluralit des fran ais d ici mais aussi sur les diverses approches qui nous permettent de comprendre leur singularit Teenagers' Perspectives on the Role of Religion in their Lives, Schools and

Societies. A European Quantitative Study Pille Valk, Gerdien Bertram-Troost, Markus Friederici, Céline Béraud, 2009 Religion is on the European agenda again The secularisation paradigm has lost its explanatory power and the newly coined term post secularism is used to describe the realisation that in the current social transformation religion cannot be ignored any longer The quantitative study presented in this book is part of the research effort by the REDCo project REDCo is the abbreviation for Religion in Education A contribution to Dialogue or a Factor of Conflict in Transforming Societies of European Countries The project brought together nine research teams from eight European countries England Estonia France Germany The Netherlands Norway Russia and Spain The research involved interdisciplinary cooperation between specialists in the different academic fields of education religious education sociology political science anthropology psychology theology and religious studies The book offers valuable interpretations and inspirations on the question how the students in the 14-16 year age group in Europe see the relevance of religions for dialogue and conflict in their daily lives in the school environment and in society as a whole The young respondents of the quantitative study are clearly aware that the diversity of religious and non religious worldviews is the reality of the European contexts they have to manage within Most of them are convinced that religion must be addressed in schools as it is too important as factor in social life and for the coexistence of people from different cultural and religious backgrounds throughout Europe to be ignored French Relations with the European Union Helen Drake, 2005 This volume examines France's relations with and responses to the European Union and the potential for further integration **The French Revolution and Religion in Global Perspective** Bryan A. Banks, Erica Johnson, 2017-09-18 This volume examines the French Revolution's relationship with and impact on religious communities and religion in a transnational perspective It challenges the traditional secular narrative of the French Revolution exploring religious experience and representation during the Revolution as well as the religious legacies that spanned from the eighteenth century to the present Contributors explore the myriad ways that individuals communities and nation states reshaped religion in France Europe the Atlantic Ocean and around the world **Historical and Sociolinguistic Approaches to French** Janice Carruthers, Mairi McLaughlin, Olivia Walsh, 2024-06-24 This volume brings together two particularly dynamic areas of contemporary research on the French language The chapters showcase the most innovative current scholarship in historical linguistics sociolinguistics and in the burgeoning field of historical sociolinguistics which lies at their intersection The research across the volume is strongly data centred drawing on a wide range of both well established and more novel theoretical and methodological approaches in order to open up new perspectives on the study of the French language in the twenty first century Although it is written in English the work presented here is underpinned by a range of different approaches from across the Francophone and Anglophone worlds Particular emphasis is placed on combining quantitative and qualitative approaches on diversifying tools methods and objects of inquiry and on adopting comparative and multilingual perspectives where these shed new light on important questions relating to French In these

ways Historical and Sociolinguistic Approaches to French highlights some of the most exciting new directions for linguistic research on the French language
