Perspectives In Differentiation And Hypertrophy:

Perspectives in Differentiation and Hypertrophy Winston A. Anderson, William A. Sadler, 1982 *Perspectives in Differentiation and Hypertrophy* WA Anderson (Ed), 1982 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1983 **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965-70 Index of NLM Serial Titles National Library of Medicine (U.S.), 1984 A keyword listing of serial titles currently received by the National Library of Medicine **Cellular and Molecular Biology of Mammary Cancer** E. Anderson, G. Heppner, W. Kidwell, Daniel Medina, 2012-12-06 The idea for this book arose during the 1985 Gordon Conference on Mammary Gland Biology. New developments in the methodology of cell biology and the explosive growth of molecular biology had begun to impact upon our understanding of mammary gland growth and function. It seemed a propitious time for summarizing the current status of knowledge of the cell and molecular biology of mammary cancer and for attempting to outline future areas of concern and interest. The reviews presented here were completed by the Fall of 1986. Although new insights will surely continue to emerge, it is hoped that the material in this volume will form not only a current update but a basic core of information for future experiments. We have not attempted to cover all areas of mammary gland transformation. Those areas where recent detailed reviews are already available have been omitted. Also the areas of normal gland development, cell ultrastructure, hormone responsiveness, chemotherapy and clinical aspects of mammary cancer have not been included. Instead we have selected those areas where the development of new methodology, reagents and results have led to new ideas about mammary gland function and development as they are related to neoplasia. Biopharmaceuticals, an Industrial Perspective G. Walsh, B. Murphy, 2013-03-09 *Biopharmaceuticals: an Industrial Perspective* provides a unique and up to date insight into the biopharmaceutical industry. Largely written by industrial authors, its scope is multidisciplinary. Several chapters overview the production and medical applications of specific biopharmaceuticals. Other chapters detail additional relevant issues including the stabilisation of biopharmaceutical products, EU biopharmaceutical regulatory affairs and biopharmaceutical patent law. A series of four chapters reviews important validation issues as applied to biopharmaceutical manufacturing. Additional issues considered include biopharmaceutical information technology as well as viral and non-viral gene therapy. The book is of particular relevance to scientists and allied professionals already employed in the biopharmaceutical industry or to those seeking employment within this industry. Its scope also renders it an ideal reference source for students undertaking advanced undergraduate or postgraduate courses in biotechnology, pharmaceutical science, biochemistry or medicine.
