Perspectives in Musicology Barry S. Brook, Edward O.D. Downes, 1985      Perspectives in Musicology : the Inaugural Lectures of the Ph.D. Program in Music at the City University of New York Barry S. Brook, Van Solkema, Sherman, Edward Downes, 1972      *Perspectives on Music, Sound and Musicology* Luísa Correia Castilho, Rui Dias, José Francisco Pinho, 2021-09-30 This book gathers a set of works highlighting significant advances in the areas of music and sound. They report on innovative music technologies, acoustics findings in musicology, new perspectives and techniques for composition, sound design and sound synthesis, and methods for music education and therapy. Further, they cover interesting topics at the intersection between music and computing, design and social sciences. Chapters are based on extended and revised versions of the best papers presented during the 6th and 7th editions of EIMAD Meeting of Research in Music Arts and Design held in 2020 and 2021 respectively at the School of Applied Arts in Castelo Branco, Portugal. All in all, this book provides music researchers, educators, and professionals with authoritative information about new trends and techniques and a source of inspiration for future research, practical developments, and for establishing collaboration between experts from different fields.

Perspectives in Music Theory Paul Cooper, 1993      **Perspectives in Music Education, Source Book III.** Music Educators National Conference (U.S.), 1966      **New Perspectives on Music and Gesture** Dr Anthony Gritten, Dr Elaine King, 2013-01-28 Building on the insights of the first volume on Music and Gesture, Gritten and King, Ashgate, 2006, the rationale for this sequel volume is twofold: first, to clarify the way in which the subject is continuing to take shape by highlighting both central and developing trends, as well as popular and less frequent areas of investigation; second, to provide alternative and complementary insights into the particular areas of the subject articulated in the first volume. The thirteen chapters are structured in a broad narrative trajectory moving from theory to practice, embracing Western and non-Western practices, real and virtual gestures, live and recorded performances, physical and acoustic gestures, visual and auditory perception, among other themes of topical interest. The main areas of enquiry include psychobiology, perception and cognition, philosophy and semiotics, conducting, ensemble work, and solo piano playing. The volume is intended to promote and stimulate further research in Musical Gesture Studies.

Perspectives on Artistic Research in Music Robert Burke, Andrys Onsman, 2017-01-23 The increasing interest in artistic research, especially in music, is throwing open doors to exciting ideas about how we generate new musical knowledge and understanding. This book examines the wide array of factors at play in

innovative practice and how by treating it as research we can make new ideas more widely accessible Three key ideas propel the book First it argues that artistic research comes from inside the practice and exists in a space that accommodates both objective and subjective observation and analyses because the researcher is the practitioner It is a space for dialogue between apparently opposing binaries the composer and the performer the past and the present the fixed and the fluid the intellectual and the intuitive the abstract and the embodied the prepared and the spontaneous the enduring and the transitory and so on It is not so much constructed in a logical sequential manner in the way of the scientific method of doing research but more as a braided space woven from many disparate elements Second the book articulates the notion that artistic research in music has its own verification procedures that need to be brought into the academy especially in terms of the moderation of non traditional research outputs including the description of the criteria for allocation of research points for the purposes of data collection as well as real world relevance and industry engagement Third by way of numerous examples of original and creative music making it demonstrates in practical terms how exploration and experimentation functions as legitimate academic research Many of the case studies deliberately cross boundaries that were previously assumed to be rigid and definite in order to blaze new musical trails creating new collaborations and synergies
