Perspectives In Operations Management Essays In Honor Of Elwood S Buffa:

Perspectives in Operations Management Rakesh K. Sarin, 2012-12-06 In the fall of 1992 a conference honoring Elwood S Buffa was held at the Anderson Graduate School of Management of the University of California Los Angeles This book is a collection of the work presented at that conference The scholars who gathered to honor El are the prominent researchers in the field of Operations Management Their collective work published in this book represents the richness of the field and provides the reader with valuable insights into its important issues and problems While any grouping of the articles by these distinguished scholars will be arbitrary I have organized the book in four sections In the first section the articles dealing with the strategic issues in Operations Management are compiled The articles deal with continuous improvement quality services supply chain management and creating value through operations The articles that explore the interface of Operations Management with other functional areas e g engineering and marketing are grouped in the second section The third section of the book contains articles that attempt to model some important planning problems that arise in the management of production and operations Some of the papers in this section provide state of the art reviews of selected topic areas Finally the fourth section contains articles that deal with future directions for Operations Management The authors offer several insights into the future evolution of the field The book begins with the keynote address given by El Buffa at the start of the conference on November 2 1991

Perspectives in Operations Management Rakesh K. Sarin, 1993 **Managing Business Interfaces** Amiya K. Chakravarty, Jehoshua Eliashberg, 2006-03-03 Amiya Chakravarty is a big name in production manufacturing and Josh Eliashberg is a huge name in marketing This is one of the first books that examines the interface of Marketing and Production with the chapters written by well known people in the field Hardcover version published in December 2003

Logistics of Production and Inventory S.C. Graves, A.H.G. Rinnooy Kan, P.H. Zipkin, 1993-05-27 Handbook Operations Management Mike Pycraft, 2000 Modern Construction Economics Gerard de Valence, 2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics

Production and Operations Analytics Steven Nahmias, Tava Lennon Olsen, 2020-10-01 Nahmias and Olsen skillfully blend comprehensive coverage of topics with careful integration of mathematics The authors decades of experience in the field contributed to the success of previous editions the eighth edition continues the long tradition of excellence Clearly written reasonably priced with an abundance of expertly formulated practice problems and updated examples this textbook is essential reading for analyzing and improving all facets of operations Some of the material in the newest edition has been reorganized For example the first chapter introduces service strategy the product process matrix and flexible manufacturing systems benchmarking the productivity frontier the innovation curve and lean production as a strategy The

focus is slightly more international The analysis of capacity growth planning now appears in the chapter on supply chain analytics Aggregate planning details were added to chapter 3 including chase and level strategies in an appendix to the chapter There is an expanded discussion on risk pooling in the chapter on supply chain strategy The mechanics behind lean production are included in the chapter on push and pull production systems The chapter on quality and assurance downplays sampling in favor of discussions of quality management process capability and the waste elimination side of lean The separate chapter on facilities layout and location was eliminated and the information redistributed throughout the text The authors reinforce the learning process through key points at the beginning of each chapter to guide the reader snapshots that provide useful examples of applications to businesses and historical notes that provide a context for the topics discussed

Harrison, Hau L. Lee, John J. Neale, 2006-04-11 For over a decade there has been an increasing interest in the use of supply chain methods to improve performance across the entire business enterprise Numerous industries have recognized the importance of efficient supply chain integration and as a result supply chain management has become a standard part of business practice The Practice of Supply Chain Management Where Theory and Application Converge is a must have volume for users of supply chain management methods supply chain management researchers and students in supply chain management The objective of the book is to provide an overview of this important practice research cycle and it is organized into three sections Core Concepts

and Practices Emerging Supply Chain Practices and Supply Chain in Action The focus of the book is on supply chain practice but supply chain practice that has been heavily influenced by supply chain research It is this synergy between research and practice that continues to simulate new directions for research **Supply Chain Engineering** Marc

Goetschalckx, 2011-08-11 The focus of Supply Chain Engineering is the engineering design and planning of supply chain systems There exists a very large variety of supply chain system types all with different goals constraints and decisions but a systematic approach for the design and planning of any supply chain can be based on the principles and methods of system engineering In this book author Marc Goetschalckx presents material developed at the Georgia Tech Supply Chain and Logistics Institute the largest supply chain and logistics research and education program in the world The book can be roughly divided into four sections The first section focuses on data management Since most of planning and design requires making decisions today so that supply chain functions can be executed efficiently in the future this section introduces forecasting principles and techniques The second section of the book focuses on transportation systems First the characteristics of transportation assets and infrastructure are shown Then four chapters focus on the planning of transportation activities depending on who controls the transportation assets The third section of the book is focused on storing goods and the last section of the book is focused on supply chain systems that consider simultaneously procurement production and transportation and inventory as well as the design of the supply chain infrastructure or network design In each chapter first a model of the process being studied is developed followed by a description of practical solution algorithms More advanced material is typically described in appendices This makes it possible to use an integrated breath first treatment of supply chain systems by using the initial material in each chapter A more in depth treatment of a specific topic or process can be found towards the end of each chapter End of chapter exercises are included throughout This text is suitable for several target audiences The first target is a course for upper level undergraduate students on supply chains The second target is the use in a capstone senior design project in the supply chain area The third target is an introductory course on supply chains either in a master of engineering or a master of business administration program and the final audience consists of students attending logistics or supply chain post graduate or continuing education courses Supply Chain Management and Advanced Planning Hartmut Stadtler, Christoph Kilger, 2013-04-17 Supply Chain Management concerns organizational aspects of integrating legally separated firms as well as coordinating materials and information flows within a production distribution network The Enterprise Resources Planning ERP systems being used for transaction handling and order execution in most firms today have been supplemented by Advanced Planning Systems APS for coordinating flows exploiting bottlenecks and keeping due dates Various optimization techniques can be applied by APS to improve plans according to business targets This book provides insights regarding the concepts underlying APS Special emphasis is given to modelling supply chains and implementing APS in industry successfully Understanding is enhanced

through the use of case studies as well as an introduction to the solution algorithms used **Factory Physics** Wallace J. Hopp, Mark L. Spearman, 2011-08-31 Our economy and future way of life depend on how well American manufacturing managers adapt to the dynamic globally competitive landscape and evolve their firms to keep pace A major challenge is how to structure the firm's environment so that it attains the speed and low cost of high volume flow lines while retaining the flexibility and customization potential of a low volume job shop The book's three parts are organized according to three categories of skills required by managers and engineers basics intuition and synthesis Part I reviews traditional operations management techniques and identifies the necessary components of the science of manufacturing Part II presents the core concepts of the book beginning with the structure of the science of manufacturing and a discussion of the systems approach to problem solving Other topics include behavioral tendencies of manufacturing plants push and pull production systems the human element in operations management and the relationship between quality and operations Chapter conclusions include main points and observations framed as manufacturing laws In Part III the lessons of Part I and the laws of Part II are applied to address specific manufacturing management issues in detail The authors compare and contrast common problems including shop floor control long range aggregate planning workforce planning and capacity management A main focus in Part III is to help readers visualize how general concepts in Part II can be applied to specific problems Written for both engineering and management students the authors demonstrate the effectiveness of a rule based and data driven approach to operations planning and control They advance an organized framework from which to evaluate management practices and develop useful intuition about manufacturing systems Progressive Trends in Knowledge and System-Based Science for Service Innovation Kosaka, Michitaka, 2013-10-31 Scientific investigation in the service industry has produced a major effect on productivity and quality in order to lead to new services With ever evolving internet technologies and information environments system science and knowledge science seem to be an effective tool for service innovation in the 21st century Progressive Trends in Knowledge and System Based Science for Service Innovation illustrates new approaches to service innovation and new methodologies from the knowledge science and system science perspectives Practitioners and researchers interested in knowing more about practical theories and successful examples in service science will find this book to be a vital asset to their studies New Service Development James A. Fitzsimmons, Mona J. Fitzsimmons, 2000 This text addresses the issues of how to develop new service products where the concept of service has moved from transaction to experience The authors draw upon the expertise of internationally recognised authors **Global Information Society** Yi-chen Lan, 2005-01-01 Covers information technology management and issues in operating information systems in the global business environment Discusses the global information technology theory frameworks and IT architecture discovery of global knowledge management improvement of the global information systems development methodologies and applications of the latest technologies such as mobile technology and Web services in global information systems development and

operations Analysis of Manufacturing Enterprises N. Viswanadham, 2012-12-06 Analysis of Manufacturing Enterprises presents a unified and systematic treatment of manufacturing enterprises These enterprises are networks of companies working in partnership Such networks are a common occurrence in auto grocery apparel computer and other industries and competition is among enterprises rather than between individual companies Thus for these enterprises global or local to succeed there is a need for systematically designing the enterprise wide value delivery processes such as the order to delivery process supply chain process and new product development process This calls for developing systematic analysis methodologies for evaluating the performance of value delivering processes Analysis of Manufacturing Enterprises fills this vital need The first part of the book focuses on foundations of manufacturing enterprises the generic value delivery process their performance measures and redesign to meet specifications on lead time and defect levels The second part provides a clear and comprehensive discussion on new product development order to delivery and supply chain processes which are core processes of a manufacturing enterprise Analysis of Manufacturing Enterprises is an excellent resource for researchers and professionals in the field of manufacturing engineering *Simulated Evolution and Learning* Xiaodong Li, Michael Kirley, Mengjie Zhang, Vic Ciesielski, Zbigniew Michalewicz, Tim Hendtlass, Kalyanmoy Deb, Jürgen Branke, 2008-11-19 This volume constitutes the proceedings of the 7th International Conference on Simulated Evolution and Learning SEAL 2008 held in Melbourne Australia during December 7 10 2008 The 65 papers presented were carefully reviewed and selected from 140 submissions The topics covered are evolutionary learning evolutionary optimisation hybrid learning adaptive systems theoretical issues in evolutionary computation and real world applications of evolutionary computation techniques

Designing and Evaluating Value Added Services in Manufacturing E-Market Places Giovanni Perrone, Manfredi Bruccoleri, Paolo Renna, 2005-03-24 This book addresses the extended enterprise paradigm and more specifically the need of innovative tools for managing the operations in enterprise networks It reports the results of a research project funded by the Italian Ministry of Education University and Research MIUR during the period 2001 2003 The aim of the research was to design implement and test an agent based architecture able to support transaction information sharing and exchange and even collaboration in a manufacturing enterprise network organized through a neutral linear e marketplace EM business model The results presented in this book testify how the proposed architecture is able to provide true value to the EM participants and can therefore be a valid support tool for the extended enterprise Audience This volume will be of interest to operations managers IT specialists and supply chain managements researchers Integrated Product, Process and Enterprise Design Ben Wang, 2012-12-06 The need exists in the private sector and government manufacturing sites to reduce product development time production lead times inventory and non value added activities At the same time there is increased pressure to improve manufacturing process yields production efficiency and resource utilization Much of the technology required to meet these needs already exists but an integrated structure that can demonstrate the potential for the technology

in a concurrent engineering context does not This book provides a road map for building the integrated technology environment to evaluate existing products manufacturing processes and system design tools This book details innovative approaches that will significantly improve design manufacturing technology development and deployment capabilities for civilian and defense applications These approaches are integrated product process and system design IPPSD initiatives which will greatly enhance the manufacturing competitiveness of the economy These approaches involve the use of simulation modeling tools and computerized virtual workstations in conjunction with a design environment which allows a diverse group of researchers manufacturers and suppliers to work within a comprehensive network of shared knowledge The IPPSD infrastructure consists of virtual workstations servers and a suite of simulation quantitative computational analytical experimental and qualitative tools Such an IPPSD infrastructure will permit effective and efficient predictions of complete product design manufacturing process design and customer satisfaction
