## **Perspectives On American Music Since 195:**

**Psychological Perspectives on Musical Experiences and Skills** Blanka Bogunović, Renee Timmers, Sanela Nikolić, 2024-06-20 Psychology of Music is a flourishing area of research in the Western Balkans. However, much of its findings and insights have remained relatively unknown outside the region. Psychological Perspectives on Musical Experiences and Skills features recent research from the Western Balkans foregrounding its specific topics, methods, and influences, and bringing it into productive conversation with complementary research from Western Europe and further afield. The essays in this collection investigate the psychology of listening and performance and their relevance to music practice. Employing a range of research methodologies, they address divergent themes from a cross-cultural understanding of aesthetic experiences and innovations to attract new audiences to developmental perspectives on musical growth and the challenges of mastering performance skills. Authors reflect independently and collaboratively on how these psychological processes are shaped by the different traditions and geopolitical conditions inside and outside the Western Balkans. The result is a volume that emphasizes how musical experiences and practices happen not in isolation but in socio-cultural environments that contribute to their definition. This work will appeal to musicians, music educators, students, researchers, and psychologists with an interest in the psychology of music and exemplify ways forward in decolonizing academia.

**Musical Modernism in Global Perspective** Björn Heile, 2024-05-30 The first study of the global dimensions of musical modernism and its transnational diasporic network of composers, musicians, and institutions.

**Making Musical Time** Guerino Mazzola, Alex Lubet, Yan Pang, Jordon Goebel, Christopher Rochester, Sangeeta Dey, 2021-11-15 This book is a comprehensive examination of the conception, perception, performance, and composition of time in music across time and culture. It surveys the literature of time in mathematics, philosophy, psychology, music theory, and somatic studies, medicine, and disability studies, and looks ahead through original research in performance, composition, psychology, and education. It is the first monograph solely devoted to the theory of construction of musical time since Kramer in 1988, with new insights, mathematical precision, and an expansive global and historical context. The mathematical methods applied for the construction of musical time are totally new. They relate to category theory, projective limits, and the mathematical theory of gestures. These methods and results extend the music theory of time but also apply to the applied performative understanding of making music. In addition, it is the very first approach to a constructive theory of time deduced from the recent theory of musical gestures and their categories. Making Musical Time is intended for a wide audience of scholars with interest in music. These include mathematicians, music theorists, ethnomusicologists, music psychologists, educators, therapists, music performers, philosophers of music, audiologists, and acousticians.

**Experimental Music Since 1970** Jennie Gottschalk, 2016-08-11 What is experimental music today? This book offers an up-to-date survey of this field for anyone with an interest, from seasoned practitioners to curious readers. This book takes the stance that experimental music is not a limited historical event but is a

proliferation of approaches to sound that reveals much about present day experience An experimental work is not identifiable by its sound alone but by the nature of the questions it poses and its openness to the sounding event Experimentation is a way of working It pushes past that which is known to discover what lies beyond it finding new knowledge forms and relationships or accepting a state of uncertainty For each of these composers and sound artists craft is developed and transformed in response to the questions they bring to their work Scientific perceptual or social phenomena become catalysts in the operation of the work These practices are not presented according to a chronology a set of techniques or social groupings Instead they are organized according to the content areas that are their subjects including resonance harmony objects shapes perception language interaction sites and histories Musical materials may be subject among other treatments to systemization observation examination magnification fragmentation translation or destabilization These restless and exploratory modes of engagement have continued to develop over recent decades expanding the scope of both musical practice and listening

Creativity and Theory in Musicianship Guerino Mazzola,Yan Pang,Jason "J-Sun" Noer,Jordon Goebel,2023-03-31 This book fills a gap between theory and creativity in musicianship This frequently observed gap fixes theory as a rigidified level of thought where creativity is excluded from a canonized corpus of ideas Creativity on the other hand is preconceived as a theory less wild activity that blossoms while performing pre composed musical structures This book provides a discussion of the creative drive in theory and theory inspired thoughts while understanding how these ideas shape performance The future of music is only as limited as one s imagination and to this end the text illuminates examples of creative musicianship

*Perspective on Experimental Music* Riccardo D. Wanke, 2021-08-10 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge      *The Music of Elliott Carter* David
